Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated,

with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever. -Neubau Forst Catalogue- is the 432-page print catalogue of a digital collection of tree silhouettes and sculptures seen at different seasons. Working by hand, the Neubau designers digitally removed the trees from their original Berlin surroundings and thereby crafted a body of visual material whose scope, outstanding quality of detail and excellent image resolution sets it clearly apart from conventional tree libraries compiled with autotracing tools. Each book contains an individual download code that guarantees you an exclusive discount of 25% on purchases from the data archive in the standard image (TIFF) and vector (EPS) format.
