Learn the Secret to Success on the Nail Technician Course and Exam! After nearly 20 years of teaching Lewis Morris discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of Books and applications to teach this "Insider's Language" to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study. The strongest students will also enjoy the puzzle and game aspect of the books. In all cases, the books provide an enjoyable break from the tedious and mundane experience of traditional test preparation. Get your copy today! This book presents the status quo of Information and Communication Technology (ICT) in Education, with a focus on China and the 17 Central and Eastern European Countries (CEECs), including Albania, Bosnia and Herzegovina, Bulgaria, Croatia, the Czech Republic, Estonia, Greece, Hungary, Latvia, Lithuania, Macedonia, Montenegro, Poland, Romania, Serbia, Slovakia and Slovenia (the "17+1" cooperation mechanism, as an incubator for pragmatic trans-regions cooperation platform, created by China and the 17 CEECs). With recent advances in ICT in

China and the CEECs, it has assumed increasingly important roles in education, including the improvement of the quality of teaching and learning, as well as the promotion of equity in education. The significant contribution of ICT in education is an enabler to achieving the goals of the “17+1 cooperation” mechanism between China and the CEECs, which has attracted considerable attention worldwide, given fresh impetus to cooperation between the two parties, and opened a new chapter in China-CEEC cooperation. The contributors, all of whom hail from these 18 countries, describe the state-of-the-art of ICT in education in their respective country, and focus on three major aspects, namely: the country profile, general status of education development, and ICT in education. In turn, leading experts in educational informatization research compare the situations in different countries. Taken together, the papers offer valuable insights for policymakers and educators on how to integrate ICT into educational processes, and on inter-regional cooperation with regard to ICT in education. Master critical concepts to succeed on your certification exam! Mosby's Comprehensive Review for Veterinary Technicians, 5th Edition is the ideal review tool which reflects the most recent changes to the Veterinary Technician National Exam (VTNE). high school programs for training technicians. Pharmacy Calculations: An Introduction for Pharmacy Technicians is designed for pharmacy technician students enrolled in a training program, technicians preparing for the certification exam, and for on-site training. As the role for pharmacy technicians continues to evolve and expand, one thing remains constant. The safety of patients is the highest priority for anyone working in pharmacy, whether in hospital, retail, or institutional practices. A thorough understanding of pharmacy math ensures accuracy in computations and safety and quality in practice. This book offers a complete review of the basic mathematics concepts and skills, which provide a foundation for more advanced understanding of pharmacy-related topics. The guide provides students with the pharmacy basics necessary for correctly interpreting prescriptions and drug orders, and for performing dosing calculations that technicians face every day. The chapters are broken down into four units and are organized to complement most pharmacy technician training curricula and to support the ASHP model curriculum: · Review of Mathematics · Systems of Measurement · Preparing for Problem Solving in Pharmacy · Dosing Calculations and Other Pharmacy Problems Key features throughout the book include: · Chapter objectives · Key terms and definitions · Examples of problem scenarios or calculations questions and solutions · “Tech Note!” —provides a highlight of key points within the chapters · “Numbers at Work” —illustrates why key concepts are important to know and skills are critical to master · Practice problems · A test bank · Appendices that include the parts of a prescription, a glossary of terms, conversions, and abbreviations tables. For additional resources related to this book, visit www.ashp.org/techcalculations.
