DigiCat Publishing presents to you this special edition of "Five Get Into a Fix" by Enid Blyton. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. 'An entrepreneur's guide to fixing your life' Financial Times 'Really interesting ... a very, very good book' Steve Wright, BBC Radio 2 (Do Less, Get More) 'Inspiring ... sage and sane advice' Booklist (Do Less, Get More) _____ Have you ever dreamt of doing something new - setting up a business, getting in shape, or writing a novel - but haven't gotten round to actually doing it? Does 'now' never feel like a good time to start? The time has come. In January 2015, entrepreneur and bestselling author Sháá Wasmund made a decision: to finally get what she wanted. Years after packing in her business (and her salary) to take the plunge, life is everything she hoped it would be. As she discovered, the key to getting what you want is within reach. Building on her many years of professional experience and inspired by her own personal challenges and sh*t-fixing moments, How to Fix Your Sh*t is your pocket life coach. In this simple and systematic guide, Wasmund will empower you to conquer fear, ditch the excuses and start living your best life today. The Five are having a wonderful time skiing. But there's another mystery to solve, because the house near their chalet is supposed to be empty. But is it really? If so, whose terrified face have they seen at the window? One thing's for sure, they must get to the truth. "The first thing you think is where's the edge, where can I make a bit more money, how can I push, push the boundaries. But the point is, you are greedy, you want every little bit of money that you can possibly get because, like I say, that is how you are judged, that is your performance metric" —Tom Hayes, 2013 In the midst of the financial crisis, Tom Hayes and his network of traders and brokers from Wall Street's leading firms set to work engineering the biggest financial conspiracy ever seen. As the rest of the world burned, they came together on secret chat rooms and late night phone calls to hatch an audacious plan to rig Libor, the 'world's most important number' and the basis for \$350 trillion of securities from mortgages to loans to derivatives. Without the persistence of a rag-tag team of investigators from the U.S., they would have got away with it.... The Fix by award-winning Bloomberg journalists Liam Vaughan and Gavin Finch, is the inside story of the Libor scandal, told through the journey of the man at the centre of it: a young, scruffy, socially awkward misfit from England whose genius for math and obsessive personality made him a trading phenomenon, but ultimately paved the way for his own downfall. Based on hundreds of interviews, and unprecedented access to the traders and brokers involved, and the investigators who caught up with them, The Fix provides a rare look into the dark heart of global finance at the start of the 21st Century. Eve's older sister, Rosie, was bright and alive and always loved being the centre of attention. Then one day, she is brutally murdered. Six months later, Eve meets Antony and discovers that he was there the night Rosie died and did nothing to help. Is there any way she can ever get past that? Inspired by the tragic murder of Sophie Lancaster, which saw Sophie and her partner Rob viciously attacked in Stubbylee Park, Bacup, Lancashire because of the way they dressed, this is a hard-hitting real-life thriller about friendship, courage, loss, forgiveness and about our society and communities. On their peaceful camping and cycling tour of the English countryside, the Five come across Richard Kent – the son of one of the richest men in the country! When Dick is mistaken for him and kidnapped, by Rooky, a dangerous criminal who had been a bodyguard in the Kent household, the children know they have two leads: Owl's Dene on Owl's Hill, and a Black Bently – KMF 102. The children's search for Dick leads them on a moonlit bicycle ride to the eerie mansion: Owl's Dene. What will they find there? And most importantly, will they be able to rescue Dick? "Highly informative and remarkably entertaining." —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever. It's time for America to move beyond zoning, argues city planner M. Nolan Gray in Arbitrary Lines: How Zoning Broke the American City and How to Fix It. With lively explanations, Gray shows why zoning abolition is a necessary—if not sufficient—condition for building more affordable, vibrant, equitable, and sustainable cities. Gray lays the groundwork for this ambitious cause by clearing up common misconceptions about how American cities regulate growth and examining four contemporary critiques of zoning (its role in increasing housing costs, restricting growth in our most productive cities, institutionalizing racial and economic segregation, and mandating sprawl). He sets out some of the efforts currently underway to reform zoning and charts how land-use regulation might work in the post-zoning American city. Arbitrary Lines is an invitation to rethink the rules that will continue to shape American life—where we may live or work, who we may encounter, how we may travel. If the task seems daunting, the good news is that we have nowhere to go but up Amos Decker, David Baldacci's unique special agent, who suffered a head injury that resulted in giving him the gift of a remarkable memory, takes on another case in The Fix. Walter Dabney is a family man. A loving husband and the father of four grown daughters, he's built a life many would be proud of. But then the unthinkable happens. Standing outside the FBI Headquarters in Washington, DC, Dabney shoots school teacher Anne Berkshire in cold blood before turning the gun on himself. One of the many witnesses is Amos Decker; a man who forgets nothing and sees what most miss. Baffled by what appears to be a seemingly senseless and random killing, Decker is thrust into the investigation to determine what drove this family man to pull the trigger. As part of an FBI special task force, Decker and the team delve into the lives of Dabney and Berkshire to find a connection that doesn't seem to exist. What they do find are secrets that stretch back a lifetime and reveal a current plot of impending destruction that will send the world reeling, placing Decker and his team squarely in the crosshairs. The Fix is the third in the Amos Decker series, following The Last Mile. Continue the investigative thrillers with The Fallen. DigiCat Publishing presents to you this special edition of "The Island of Adventure" by Enid Blyton. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. Explains how to upgrade and repair processors, memory, connections, drives, multimedia cards, and peripherals. In the vein of #Girlboss and Nice Girls Don't Get the Corner Office, discover how to thrive at work from the head of the Global Innovation Coalition for Change at UN Women with this "passionate, practical roadmap for addressing inequality and finally making our workplaces work for women" (Arianna Huffington). For years, we've been telling women that in order to succeed at work, they have to change themselves first—lean in, negotiate like a man, don't act too nice or you'll never get the corner office. But after sixteen years working with major Fortune 500 companies as a gender equality expert, Michelle King has realized one simple truth—the tired advice of fixing women doesn't fix anything. The truth is that workplaces are gendered; they were designed by men for men. Because of this, most organizations unconsciously carry the idea of an "ideal worker," typically a straight, white man who doesn't have to juggle work and family commitments. Based on King's research and exclusive interviews with major companies and thought leaders, The Fix reveals why denying the fact that women are held back just because they are women—what she calls gender denial—is the biggest obstacle holding women back at work and outlines the hidden sexism and invisible barriers women encounter at work every day. Women who speak up are seen as pushy. Women who ask for a raise are seen as difficult. Women who spend hours networking don't get the same career benefits as men do. Because women don't look like the ideal worker and can't behave like the ideal worker, they are passed over for promotions, paid less, and pushed out of the workforce, not because they aren't good enough, but because they aren't men. In this fascinating and empowering book, King outlines the invisible barriers that hold women back at all stages of their careers, and provides readers with a clear set of takeaways to thrive despite the sexist workplace, as they fight for change from within. Gender equality is not about women, and it is not about men—it is about making workplaces work for everyone. Together, we can fix work, not women. Why are we all taught maths for years of our lives? Does it really empower anyone? Or fail most and disenfranchise many? Is it crucial for the AI age or an obsolete rite of passage? The Math(s) Fix: An Education Blueprint for the AI Age is a groundbreaking book that exposes why maths education is in crisis worldwide and how the only fix is a fundamentally new mainstream subject. It argues that today's maths education is not working to elevate society with modern computation, data science and AI. Instead, students are subjugated to compete with what computers do best, and lose. This is the only book to explain why being "bad at maths" may be as much the subject's fault as the learner's: how a stuck educational ecosystem has students, parents, teachers, schools, employers and policymakers running in the wrong direction to catch up with real-world requirements. But it goes further too—"for the first time setting out a completely alternative vision for a core computational school subject to fix the problem and seed more general reformation of education for the AI age. "Fix Her Up ticks all my romance boxes. Not only is it hilarious, it's sweet, endearing, heartwarming and downright sexy. It's a recipe for the perfect love story." – Helena Hunting, New York Times bestselling author of Meet Cute A steamy, hilarious new romantic comedy from New York Times bestselling author Tessa Bailey, perfect for fans of Christina Lauren and Sally Thorne! Georgette Castle's family runs the best home renovation business in town, but she picked balloons instead of blueprints and they haven't taken her seriously since. Frankly, she's over it. Georgie loves planning children's birthday parties and making people laugh, just not at her own expense. She's determined to fix herself up into a Woman of the World... whatever that means. Phase one: new framework for her business (a website from this decade, perhaps?) Phase two: a gut-reno on her wardrobe (fyi, leggings are pants.) Phase three: updates to her exterior (do people still wax?) Phase four: put herself on the market (and stop crushing on Travis Ford!) Living her best life means facing the truth: Georgie hasn't been on a date since, well, ever. Nobody's asking the town clown out for a night of hot sex, that's for sure. Maybe if people think she's having a steamy love affair, they'll acknowledge she's not just the "little sister" who paints faces for a living. And who better to help demolish that image than the resident sports star and tabloid favorite. Travis Ford was major league baseball's hottest rookie when an injury ended his career. Now he's flipping houses to keep busy and trying to forget his glory days. But he can't even cross the street without someone recapping his greatest hits. Or making a joke about his... bat. And then there's Georgie, his best friend's sister, who is not a kid anymore. When she proposes a wild scheme—that they pretend to date, to shock her family and help him land a new job—he agrees. What's the harm? It's not like it's real. But the girl Travis used to tease is now a funny, full-of-life woman and there's nothing fake about how much he wants her... Climate change seems to be an insurmountable problem. Political solutions have so far had little impact. Some scientists are now advocating the so-called 'Plan B', a more direct way of reducing the rate of future warming by reflecting more sunlight back to space, creating a thermostat in the sky. In this book, Mike Hulme argues against this kind of hubristic techno-fix. Drawing upon a distinguished career studying the science, politics and ethics of climate change, he shows why using science to fix the global climate is undesirable, ungovernable and unattainable. Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks, improving regional air quality and driving forward an energy technology transition. Seeking to reset the planet's thermostat is not the answer. Climate change seems to be an insurmountable problem. Political solutions have so far had little impact. Some scientists are now advocating the so-called 'Plan B', a more direct way of reducing the rate of future warming by reflecting more sunlight back to space, creating a thermostat in the sky. In this book, Mike Hulme argues against this kind of hubristic techno-fix. Drawing upon a distinguished career studying the science, politics and ethics of climate change, he shows why using science to fix the global climate is undesirable, ungovernable and unattainable. Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks, improving regional air quality and driving forward an energy technology transition. Seeking to reset the planet's thermostat is not the answer. In The Slow Fix, bestselling author Carl Honoré delivers an exhilarating model for effective problem-solving, and provides brilliant insights on how you can solve problems, work smarter, and live better. Honoré decodes how we approach problems and paves the way to better decision-making and generating long-term solutions to life's inevitable challenges. Engaging and thought-provoking, The Slow Fix revolutionizes the way we live, work, consume, and think, ultimately increasing our wins and enhancing personal success. With The Slow Fix, Honoré details a new paradigm for efficient, sustainable problem solving, teaching us how to use time to build expertise, take advantage of teamwork, find the right messenger to deliver our message, and much more. Who lives in the mysterious house near the chalet the Famous Five are staying in? The caretaker says nobody - but the Five have seen a terrified face at the window. This is one of a series of reissues published to commemorate the centenary of Enid Blyton's birth. Duck's attempts to deal with various minor disasters only lead to more problems. We need a world trade organization. We just don't need the one that we have. By pitching unequally matched states together in chaotic bouts of negotiating the global trade governance of today offers - and has consistently offered - developed countries more of the economic opportunities they already have and developing countries very little of what they desperately need. This is an unsustainable state of

affairs to which the blockages in the Doha round provide ample testimony. So far only piecemeal solutions have been offered to refine this flawed system. Radical proposals that seek to fundamentally alter trade governance or reorient its purposes around more socially progressive and egalitarian goals are thin on the ground. Yet we eschew deeper reform at our peril. In *What's Wrong with the World Trade Organization and How to Fix It* Rorden Wilkinson argues that without global institutions fit for purpose, we cannot hope for the kind of fine global economic management that can put an end to major crises or promote development-for-all. Charting a different path he shows how the WTO can be transformed into an institution and a form of trade governance that fulfils its real potential and serves the needs of all. On 9/11 the U.S. had effectively no counterterrorism doctrine. Fast forward ten years: Osama bin Laden is dead; al Qaeda is organizationally ruined and pinned in the tribal areas of Pakistan and Afghanistan; there has been no major attack on American soil; and while there has been at least one instance of a massive planned attack, it was crushed by the greatest international collaboration of intelligence services seen since the end of the Cold War. It's been a remarkable transformation. Aki Peritz and Eric Rosenbach have experienced first-hand the monumental strategy changes in our country's counterterrorism strategy within the intelligence, defense, and political communities. In this book, they show how America learned to be very good at taking on the terrorists, often one at a time, in ever more lethally incisive operations. They offer new details behind some headlines from the last decade. They are frank about the mistakes that have been made. And they explain how a concept coined by General Grant during the Civil War has been reinvented in the age of satellite technology to manage a globally distributed foe, allowing the U.S. to find, fix, and finish its enemies. *Massing* confronts the failure of the "war on drugs" and documents the much greater potential for reclaiming drug addicts that can be had by treatment and support rather than criminalization, and at a lower cost than building ever more prisons and militarizing drug source countries in Latin America. Are you ready to unleash the power that has been inside you all your life? *The Fix Yourself Handbook* presents the Process Way of Life, a step-by-step program that can transform your life into one that is happy, healthy, purposeful, and content. Who we are is the product of the interplay between our physical, intellectual, emotional, and spiritual attributes. The Process Way of Life's fifty-two internal processes will help you create a state of internal balance as these four attributes operate together, providing you with a pure loving energy source that will change your life. Learning to understand and love yourself, and to apply your love to others, is the enduring final gift of the Process Way of Life. The Process Way of Life is the product of more than twenty years of Faust Ruggiero's research and practical counseling application. It is your guide on an exciting and enlightening life journey that will touch every part of you. The Process Way of Life creates one of life's most exciting and wondrous life journeys, and yours is about to begin. Ragamuffin Jo could have been George's double—it was astonishing how much alike they were. And Jo had a way with dogs, too. She was fearless, and could climb like a cat, which was lucky when it came to making a quick get-away from Red Tower. The Five certainly met adventure when they met Jo on Kirrin beach. This book provides an array of concise solutions to the wide variety of problems that are faced by postproduction artists in the post process. With an application-agnostic approach, it gives proven, step-by-step methods to solving the most frequently encountered postproduction problems. Solutions are provided for common audio, video, digital, editorial, color, timing and compositing problems.—From publisher description. The Five go to a lonely hut on the Welsh mountainside for a tobogganing holiday, but at night they are puzzled by terrifying rumblings underground, and luminous shimmerings above ground—and Ally with her pet lamb leads them into a very strange adventure. Julian, Dick, Anne, George and Timmy the dog find excitement and adventure wherever they go in Enid Blyton's most popular series. In book seventeen, the Famous Five are skiing and having lots of fun. But who is living in the mysterious house near their chalet? The caretaker claims it's been deserted for years, but the Five are sure they've seen a face at the window. A terrified, and haunted face. Have the gang got the courage to find out? The text in this edition has been sensitively edited for today's reader and is unillustrated. Friends fix you up with blind dates. Real friends fix you up with your fantasies... Regina just ended an awful relationship. The last thing she needs is her friends' help in finding a new one. When they pressure her into sharing her fantasies, she makes up one she thinks could never come true. After all, vampires don't even exist. Right? Wrong. And Dmitri Vid'me is the proof. He sees Regina's thoughts and knows her darkest fantasies. What Regina needs is someone who bring handcuffs as well as roses and who sees the possibilities offered by her sensual and giving nature. With all the electricity sparking between them, and some sneaky mental eavesdropping, Dmitri knows she wants him, too. He just doesn't know if she'll feel the same once she finds out about his nocturnal habits and his liquid diet. Julian, Dick, Anne, George and Timmy the dog find excitement and adventure wherever they go in Enid Blyton's most popular series. In book eighteen, the Famous Five hunt for the lost dungeons of a ruined castle on Finniston Farm. The friends are determined to find them, and whatever they hide, but they are not alone. Can the Famous Five get there first? The text in this edition has been sensitively edited for today's reader and is unillustrated. Do you have crud in the blood? Millions of people suffer from autoimmunity whether they know it or not. The root cause of most weight gain, brain and mood problems, and fatigue, autoimmunity can take years—or even decades—for symptoms and a clear diagnosis to arise. Through years of research, Dr. Tom O'Bryan has discovered that autoimmunity is actually a spectrum, and many people experiencing general malaise are already on it. And while autoimmune diseases, such as Alzheimer's, Multiple Sclerosis, osteoporosis, diabetes, and lupus, have become the third leading cause of death behind heart disease and cancer, many people affected are left in the dark. The good news is that many autoimmune conditions can be reversed through a targeted protocol designed to heal the autoimmune system, 70 percent of which is located in the gut. The Autoimmune Fix includes two comprehensive 3-week plans: In the first 3 weeks, you'll follow a Paleo-inspired diet during which you cut out gluten, sweets, and dairy—the three primary culprits behind autoimmunity. Once the dietary changes have been addressed, The Autoimmune Fix focuses on the other causes of autoimmunity such as genetics, other dietary issues, and microbiome. The Autoimmune Fix provides a practical and much-needed guide to navigating these increasingly common conditions to help you feel better and develop a plan that works for you. WALL•E is back! And with a new friend! Disney•Pixar is delivering up their newest animated short on the WALL•E DVD. Centuries in the future and far off in outer space, meet an adorable little welding-bot. BURN•E's hilarious misadventures on the side of the Axiom spaceship are retold in this sweet and simple Step 1 reader that is sure to have young robot lovers on cloud nine. A Buzzfeed Best YA Book of 2021! A gritty, heart-wrenching novel of disability, pain, belonging, loss, addiction, and friendship. Everything was fine before. When Eve and Lidia could hide their physical differences inside goofy Burger Hut costumes. When Lidia shook Eve up and Eve made Lidia laugh. When Lidia was there. Everything is different now. Cut open . . . rearranged . . . stapled shut, Eve is left alone to recover in a world of pain and a body she no longer recognizes. Her only companions being a bottle of Roxanol and an infuriating (but cute) neighbor, Eve strikes up a relationship—and makes a pact—with the devil. Sacrificing pieces of a place she doesn't know to return to a place she does. What will she discover when she unravels her past? And is having Lidia back worth the price? In verse and prose, Fix paints a riveting picture of a teen struggling to find herself and move forward with her life in a sea of opioids, regret, grief, and hope. Longlisted for the FT/McKinsey Business Book of the Year Award'Readers looking for good news will love this book. Jonathan Tepperman makes a compelling case, in lively and personal prose, that strong leaders willing to forsake political orthodoxy for good ideas can actually solve the toughest problems the world faces.' Ann-Marie Slaughter, author of *Unfinished Business* The world's most intractable problems solved: ambitious lessons in leadership and hope from free-thinkers and innovators who have tackled our biggest challengesFrom immigration reform to energy resources, from political paralysis to inequality and extremism, we are beset by a raft of huge and seemingly insurmountable issues. The daily newspapers, the rolling 24-hour television news, portray a world in terminal decline. What goes under-reported are the success stories. Here, taking ten of the most knotty issues we face today, Jonathan Tepperman examines unsung individuals' bold and innovative attempts against all odds and expectations to solve some of the important problems governments have struggled with for decades. Each chapter tells the story of one government that's found a way to avoid the snares that entangle most of the others. The solutions described in the book aren't speculative: they've all already been tried, and they work. Controversial, provocative but always stimulating, Tepperman here offers a powerful, data-driven case for optimism. Written with flair and an infectious exuberance, *The Fix* is a book to restore hope to the pessimistic, and offer both practical advice and inspiration in a time of relentless bad news. "Restarting the Future argues that the big economic challenges facing the world are the result of our failure to deal with the implications of an economy dependent on knowledge, ideas and relationships. It examines why making this transition is so hard, and looks at ways forward in the fields of public policy, business and finance. The troubling state of rich-world economies (low productivity growth, high inequality, populist instability, climate crisis) is significantly the result of the troubled and incomplete shift to a new type of economy - specifically, the move from an economy dependent on tangible capital to one dependent on intangible capital. At the heart of the problem is a significant slowdown in the pace of intangible investment since the financial crisis. (There were some early signs of this at the time the authors were writing their previous book, *Capitalism without Capital*, but new data now makes the severity and persistence of this slowdown clear.) This slowdown has happened because we lack the right institutions and strategies to encourage intangible investment and channel it effectively. What is more, there are significant groups with an interest in stopping these new institutions emerging. Contrary to the dominant narrative that focuses on the tension between a successful, future-facing "elite" and a mass of low-status "left-behinds", the authors argue that many of the people and organisations with an interest in holding back the future are affluent and high-status, including affluent retirees, established financial institutions and graduate knowledge workers. Haskel & Westlake survey attempts to fix these institutional problems, explaining how they work in the context of the intangible economy, and what the upside to solving them might be. They describe interesting and topical policy experiments and business strategies (such as Preston's Local Economic Strategy, or topical new business models like WeWork and CloudKitchens) and set them in a novel economic context. (Specifically, these sections look at city policy, business finance and investment, public investment, competition policy, monetary policy, mitigating climate change and business strategies for tangible-based firms. The authors close the book with a political programme for how to get over the teething troubles of the new economy"-- 'HOW TO FIX A BROKEN HEART PROVIDES THE VALIDATION, COMFORT AND HOPE ANYONE WHO IS HEARTBROKEN DESPERATELY NEEDS.' ESTHER PEREL, BESTSELLING AUTHOR OF THE STATE OF AFFAIRS AND MATING IN CAPTIVITY Every one of us has or will have our heart broken at some point in our lives. Heartbreak, whether it comes in the form of romantic love or through loss, is universal, yet we know so little about how to deal with it. Psychologist Dr Guy Winch imagines how different our lives and our society would be if we paid more attention to this unique emotional pain. Heartbreak can last for days, weeks, months and even years. Yet while we wouldn't expect someone to go to work or function well with a broken limb, heartbroken people are expected to function in their lives, despite the emotional pain they feel. *How to Fix a Broken Heart* argues that if we don't understand how heartbreak works, we won't be able to heal it and we are likely to make it worse, which we do, and regularly. Dr Winch reveals how and why heartbreak impacts our brain and our behaviour in dramatic and unexpected ways, regardless of our age. Emotional pain lowers our ability to reason, to think creatively, to problem solve and to function. Recovering from heartbreak always starts with a decision, a determination to move on when our mind is fighting to keep us stuck. We can take control of our lives and our minds and put ourselves on the path to healing. Dr Winch offers a toolkit on how to handle and cope with a broken heart and how to, eventually, move on. 'A great read for anyone going through heartbreak, anyone trying to help someone go through heartbreak, or anyone who simply wants to understand humans better' Tim Urban, creator of *Wait But Why?* From Mike Michalowicz, the author of *PROFIT FIRST*, *CLOCKWORK*, and *THE PUMPKIN PLAN*, comes the ultimate diagnostic tool for every entrepreneur. The biggest problem entrepreneurs have is that they don't know what their biggest problem is. If you find yourself trapped between stagnating sales, staff turnover, and unhappy customers, what do you fix first? Every issue seems urgent -- but there's no way to address all of them at once. The result? A business that continues to go in endless circles putting out urgent fires and prioritizing the wrong things. Fortunately, Mike Michalowicz has a simple system to help you eradicate these frustrations and get your business moving forward, fast. Mike himself has lived through the struggles and countless distractions of entrepreneurship, and devoted years to finding a simple way to pinpoint exactly where to direct attention for rapid growth. He figured out that every business has a hierarchy of needs, and if you can understand where you are in that hierarchy, you can identify what needs immediate attention. Simply fix that one thing next, and your business will naturally and effortlessly level-up. Over the past decade, Mike has developed an ardent following for his funny, honest, and actionable insights told through the stories of real entrepreneurs. Now, *Fix This Next* offers a simple, unique, and wildly powerful business compass that has already helped hundreds of companies get to the next level, and will do the same for you. Immediately. Meet Julian, Dick, Anne, George and Timothy. Together they are THE FAMOUS FIVE - Enid Blyton's most popular adventure series. All 21 titles also available as audiobooks! In book seventeen, the Famous Five are skiing and having lots of fun. But who is living in the mysterious house near their chalet? The caretaker claims it's been deserted for years, but the Five are sure they've seen a face at the window. A terrified, and haunted face. Have the gang got the courage to find out? Fantastic new cover art by Laura Ellen Anderson will draw young readers into this accessible timeless classic. "A superbly entertaining read." —Kirkus Reviews (starred review) "Will win over teens." —School Library Journal (starred review) A teen boy's world gets turned upside-down when a zoo of exotic animals takes over his small town in this wickedly funny, heartbreakingly honest novel that's perfect for fans of David Arnold. In Makersville, Indiana, people know all about Ronney—he's from that mixed-race family with the dad who tried to kill himself, the pill-popping mom, and the genius kid sister. If having a family like that wasn't bad enough, the local eccentric at the edge of town decided one night to open up all the cages of his exotic zoo—lions, cheetahs, tigers—and then shoot himself dead. Go figure. Even more proof that you can't trust adults to do the right thing. Overnight, news crews, gun control supporters, and gun rights advocates descend on Makersville, bringing around-the-clock news coverage, rallies, and anti-rallies with them. With his parents checked out, Ronney is left tending to his sister's mounting fears of roaming lions, stopping his best friend from going on a suburban safari, and shaking loose a lonely boy who follows Ronney wherever he goes. Can Ronney figure out a way to hold it together as all his worlds fall apart? From acclaimed author Crystal Chan comes an incisive tale of love, loyalty, and the great leaps we take to protect the people and places we love most.
