In *Gold Wings Rising*, the final installment of Alex London's *Skybound Saga*, Kylee and Brysen must fight for their lives and their humanity. Book 1 was a Today Show Book Club Pick! The war on the ground has ended, but the war with the sky has just begun. After the Siege of the Six Villages, the ghost eagles have trapped Uztaris on both sides of the conflict. The villagers and Kartami alike hide in caves, huddled in terror as they await nightly attacks. Kylee aims to plunge her arrows into each and every ghost eagle; in her mind, killing the birds is the only way to unshackle the city's chains. But Brysen has other plans. While the humans fly familiar circles around each other, the ghost eagles create schemes far greater and more terrible than either Kylee or Brysen could have imagined. Now, the tug-of-war between love and power begins to fray, threatening bonds of siblinghood and humanity alike. Offers an insider's account of a fast and dangerous society (Cannonball Run of the 1970s). ? "This amazing outpouring of strength and honesty offers inspirational personal accounts for every reader who wonders what to do when everything seems impossible." --Booklist, starred review A 2019 Texas Topaz Reading List Selection A Junior Library Guild Selection Hope is a decision, but it is a hard one to recognize in the face of oppression, belittlement, alienation, and defeat. To help embolden hope, here is a powerhouse collection of essays and personal stories that speak directly to teens and all YA readers. Featuring Angie Thomas, Marie Lu, Nicola Yoon, David Levithan, Libba Bray, Jason Reynolds, Renée Ahdieh, and many more! "The hope of a secure and livable world lies with disciplined nonconformists who are dedicated to justice, peace and brotherhood."--Rev. Martin Luther King, Jr. We all experience moments when we struggle to understand the state of the world, when we feel powerless and--in some cases--even hopeless. The teens of today are the caretakers of tomorrow, and yet it's difficult for many to find joy or comfort in such a turbulent society. But in trying times, words are power. Some of today's most influential young adult authors come together in this highly personal collection of essays and original stories that offer moments of light in the darkness, and show that hope is a decision we all can make. Like a modern day Chicken Soup for the Teenage Soul or Don't Sweat the Small Stuff for Teens, Hope Nation acknowledges the pain and offers words of encouragement. Authors include: Atia Abawi, Renee Ahdieh, Libba Bray, Howard Bryant, Ally Carter, Ally Condie, Christina Diaz Gonzales, Gayle Forman, Romina Garber, I. W. Gregario, Kate Hart, Bendan Kiely, David Levithan, Alex London, Marie Lu, Julie Murphy, Jason Reynolds, Aisha Saeed, Nic Stone, Angie Thomas, Jenny Torres Sanchez, Jeff Zentner, and Nicola Yoon. Praise for Hope Nation: "A salve when days are bleak."--Kirkus Reviews "An important and inspiring read for thoughtful teens."--School Library Journal Aristotle and Dante Discover the Secrets of the Universe is the beloved cult classic about family, friendship and first love, from award-winning author Benjamin Alire Sáenz. This lyrical novel will enrapture readers of John Green, Love, Simon and Call Me by Your Name. Aristotle is an angry teen with a brother in prison. Dante is a know-it-all who has a unique perspective on life. When the two meet at the swimming pool, they seem to have nothing in common. But as the loners start spending time together, they develop a special friendship – the kind that changes lives and lasts a lifetime. And it is through this friendship that Ari and Dante will learn the most important truths about the universe, themselves and the kind of people they want to be. This incredibly moving and powerful Printz Honor Book follows two teen boys learning to open themselves up to love, despite the world being against them. 'A tender, honest exploration of identity' – Publishers Weekly "Put down what you're doing and read this book. Right now. The complex characters, intricate world, and blistering pace are off-the-charts amazing." —Marie Lu, author of the Legend trilogy Syd's life is not his own. As a proxy he must to pay for someone else's crimes. When his patron Knox crashes a car and kills someone, Syd is branded and sentenced to death. The boys realize the only way to beat the system is to save each other so they flee. The ensuing cross-country chase will uncover a secret society of rebels, test the boys' resolve, and shine a blinding light onto a world of those who owe and those who pay. This fast-paced thrill ride of a novel is full of breakneck action, shocking twists and heart-hammering suspense that will have readers gasping until the very last page. This edition includes an exclusive bonus story featuring Syd and Knox! "Looking for an awesome YA summer read? Look no further than Alex London's Proxy." —EW.com "Whipping Boy + Blade Runner with a sprinkling of The Hunger Games (plus, of course, a dash of A Tale of Two Cities) = a treat for teen SF fans." —Kirkus Reviews In a modern mega-city built around dragons, one boy gets caught up in the world of underground dragon battles and a high-stakes gang war that could tear his family apart. In the city of Drakopolis, dragons and humans have co-existed for centuries. Dragons burn the city's garbage, taxi its busy citizens from place to place, and even compete in vicious underground battles for ganglike kins. But the dragons also compete in legal sports, like the spectacular aerial races that draw in cheering crowds by the tens of thousands. Abel is at just such a race when he witnesses the unthinkable. A long-shot competitor pulls off an impossible win -- then flies into a destructive rage! Someone in the city is experimenting on dragons: hacking their DNA, rebuilding their bodies, and breaking their minds. Who could be driving the dragons berserk? Abel must find out who's behind the experiments and put a stop to them, and to do so he'll infiltrate the kins' underground street races on a long-shot dragon of his own. But with his sister working for a kin, his brother serving the city's secret police, and a bully at school racing for Abel's worst enemies, will Abel find any safety past the finish line? In *Red Skies Falling*, Alex London's thrilling sequel to *Black Wings Beating*, the epic fantasy *Skybound Saga* continues as twins Kylee and Brysen are separated by the expanse of Uztar, but are preparing for the same war--or so they think. Kylee is ensconced in the Sky Castle, training with Mem Uku to master the Hollow Tongue and the Ghost Eagle. But political intrigue abounds and court drama seems to seep through the castle's stones like blood from a broken feather. Meanwhile, Brysen is still in the Six Villages, preparing for an attack by the Kartami. The Villages have become Uztar's first line of defense, and refugees are flooding in from the plains. But their arrival lays bare the villagers' darkest instincts. As Brysen navigates the growing turmoil, he must also grapple with a newfound gift, a burgeoning crush on a mysterious boy, and a shocking betrayal. The two will meet again on the battlefield, fighting the same war from different sides. But the Ghost Eagle has its own plans. A guide to Microsoft Exchange server covers such topics as installation, administration, routing, Active Directory integration, and controlling public folder creation. In this highly-illustrated series from James Patterson, an extraordinary robot signs up for an ordinary fifth grade class . . . and elementary school will never be the same! It was never easy for Sammy Hayes-Rodriguez to fit in, so he's dreading the day when his genius mom insists he bring her newest invention to school: a walking, talking robot he calls E-for "Error". Sammy's no stranger to robots; his house is full of a colorful cast of them. But this one not only thinks it's Sammy's brother . . . it's actually even nerdier than Sammy. Will E be Sammy's one-way ticket to Loserville? Or will he prove to the world that it's cool to be square? It's a roller-coaster ride for Sammy to discover the amazing secret E holds that could change family forever . . . if all goes well on the trial run! This book is a legal and political intervention into a contemporary debate concerning the appropriateness of sexual offence prosecutions brought against young gender non-conforming people for so-called 'gender identity fraud'. It comes down squarely against prosecution. To that end, it offers a series of principled objections based both on liberal principles, and arguments derived from queer and feminist theories. Thus prosecution will be challenged as criminal law overreach and as a spectacular example of legal inconsistency, but also as indicative of a failure to grasp the complexity of sexual desire and its disavowal. In particular, the book will think through the concepts of consent, harm and deception and their legal application to these specific forms of intimacy. In doing so, it will reveal how cisnormativity frames the legal interpretation of each and how this serves to preclude more marginal perspectives. Beyond law, the book takes up the ethical challenge of the non-disclosure of gender history. Rather than dwelling on this omission, it argues that we ought to focus on a cisgender demand to know as the proper object of ethical inquiry. Finally, and as an act of legal and ethical re-imagining, the book offers a queer counter-judgment to *R v McNally*, the only case involving a gender non-conforming defendant, so far, to have come before the Court of Appeal. A Financial Times Book of the Year 2020! Should

companies be run for profit or purpose? In this ground-breaking book, acclaimed finance professor and TED speaker Alex Edmans shows it's not an either-or choice. Drawing from real-life examples spanning industries and countries, Edmans demonstrates that purpose-driven businesses are consistently more successful in the long-term. But a purposeful company must navigate difficult trade-offs and take tough decisions. Edmans provides a roadmap for company leaders to put purpose into practice, and overcome the hurdles that hold many back. He explains how investors can discern which companies are truly purposeful and how to engage with them to unleash value for both shareholders and society. And he highlights the role that citizens can play in reshaping business to improve our world. This edition has been thoroughly updated to include the pandemic, the latest research, and new insights on how to make purpose a reality. In a modern mega-city built around dragons, one boy gets caught up in the world of underground dragon battles and a high-stakes gang war that could tear his family apart. Once, dragons nearly drove themselves to extinction. But in the city of Drakopolis, humans domesticated them centuries ago. Now dragons haul the city's cargo, taxi its bustling people between skyscrapers, and advertise its wares in bright, neon displays. Most famously of all, the dragons battle. Different breeds take to the skies in nighttime bouts between the infamous kins—criminal gangs who rule through violence and intimidation. Abel has always loved dragons, but after a disastrous showing in his dragon rider's exam, he's destined never to fly one himself. All that changes the night his sister appears at his window, entrusting him with a secret...and a stolen dragon. Turns out, his big sister is a dragon thief! Too bad his older brother is a rising star in Drakopolis law enforcement... To protect his friends and his family, Abel must partner with the stolen beast, riding in kin battles and keeping more secrets than a dragon has scales. When everyone wants him fighting on their side, can Abel figure out what's worth fighting for? An accessible introduction to the author of *Capital* and coauthor of *The Communist Manifesto*, with a focus on his relevance in today's world. Few thinkers have been declared irrelevant and out-of-date with such frequency as Karl Marx. Hardly a decade has gone by since his death in which establishment critics have not announced the death of his theory. And yet, despite their best efforts to bury him, Marx's specter continues to haunt his detractors more than a century after his passing. As the boom and bust cycle of global capitalism continues to widen inequality around the world, a new generation is discovering that the problems Marx addressed in his time are remarkably similar to those of our own. In this engaging and accessible introduction, Alex Callinicos demonstrates that Marx's ideas hold an enduring relevance for today's activists fighting against poverty, oppression, environmental destruction, and the numerous other injustices of the capitalist system. A popular model of human action treats it as universally explicable by appeal to what we want. A related view evaluates our actions as rational or otherwise by appeal to what we ought to do — sometimes explain our actions. Second, that those beliefs are crucial for determining whether our actions are rational. To try and resolve these tensions, this book defends 'desire-as-belief', the view that desires are just a special subset of our normative beliefs. This view entitles us to accept orthodox models of human motivation and rationality that explain those things with reference to desire, while also making room for our normative beliefs to play a role in those domains. This view also tells us to diverge from the orthodox view on which desires themselves can never be right or wrong. Rather, according to desire-as-belief, our desires can themselves be assessed for their accuracy, and they are wrong when they misrepresent normative features of the world. Hume says that it is not contrary to reason to prefer the destruction of the whole world to the scratching of your finger, but he is wrong: it is foolish to have this preference, and this is so because this preference misrepresents the relative worth of these things. This book mounts an engaging and comprehensive defence of these ideas. Kubernetes has become the dominant container orchestrator, but many organizations that have recently adopted this system are still struggling to run actual production workloads. In this practical book, four software engineers from VMware bring their shared experiences running Kubernetes in production and provide insight on key challenges and best practices. The brilliance of Kubernetes is how configurable and extensible the system is, from pluggable runtimes to storage integrations. For platform engineers, software developers, infosec, network engineers, storage engineers, and others, this book examines how the path to success with Kubernetes involves a variety of technology, pattern, and abstraction considerations. With this book, you will: Understand what the path to production looks like when using Kubernetes Examine where gaps exist in your current Kubernetes strategy Learn Kubernetes's essential building blocks--and their trade-offs Understand what's involved in making Kubernetes a viable location for applications Learn better ways to navigate the cloud native landscape Transcendental equations arise in every branch of science and engineering. While most of these equations are easy to solve, some are not, and that is where this book serves as the mathematical equivalent of a skydiver's reserve parachute--not always needed, but indispensable when it is. The author's goal is to teach the art of finding the root of a single algebraic equation or a pair of such equations. The pulse-pounding sequel to *Proxy!* Inspired by *The Whipping Boy* and *Feed*, this adrenaline-fueled thriller will appeal to fans of *The Maze Runner* and *Divergent*. Once a proxy, now the figurehead of the Revolution, Syd is a savior to some and a target for others. His bodyguard Liam must protect Syd with his life but armed Machinists aren't the only danger in the post-Jubilee world. A horrible disease is infecting people and since Guardians are hit first the government does nothing to help. Syd decides it's up to him to find a cure. . . And what he discovers leaves him stunned. This heart-stopping thriller is packed with volatile action and breathtaking heroics that will have readers racing to its epic conclusion. Hurst & Co., 2011. Bill Brewer presents, motivates, and defends a bold new solution to a fundamental problem in the philosophy of perception. What is the correct theoretical conception of perceptual experience, and how should we best understand the most fundamental nature of our perceptual relation with the physical objects in the world around us? Most theorists today analyse perception in terms of its representational content, in large part in order to avoid fatal problems attending the early modern conception of perception as a relation with particular mind-dependent objects of experience. Having set up the underlying problem and explored the lessons to be learnt from the various difficulties faced by opposing early modern responses to it, Bill Brewer argues that this contemporary approach has serious problems of its own. Furthermore, the early modern insight that perception is most fundamentally to be construed as a relation of conscious acquaintance with certain direct objects of experience is, he claims, perfectly consistent with the commonsense identification of such direct objects with persisting mind-independent physical objects themselves. Brewer here provides a critical, historical account of the philosophy of perception, in order to present a defensible vindication of empirical realism. A major new manifesto for the end of capitalism Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics. A rigorous investigation of Socrates' early education, pinpointing the thought that led Socrates to turn from natural science to the study of morality, ethics, and politics "Put down what you're doing and read this book. But how do you know what you are thinking and feeling? This is the problem of self-knowledge: Alex Byrne tries to solve it. The idea is that you know this not by taking a special kind of look at your own mind, but by an inference from a premise about your environment. How big data and machine learning encode discrimination and create agitated clusters of

comforting rage. In *Discriminating Data*, Wendy Hui Kyong Chun reveals how polarization is a goal—not an error—within big data and machine learning. These methods, she argues, encode segregation, eugenics, and identity politics through their default assumptions and conditions. Correlation, which grounds big data’s predictive potential, stems from twentieth-century eugenic attempts to “breed” a better future. Recommender systems foster angry clusters of sameness through homophily. Users are “trained” to become authentically predictable via a politics and technology of recognition. Machine learning and data analytics thus seek to disrupt the future by making disruption impossible. Chun, who has a background in systems design engineering as well as media studies and cultural theory, explains that although machine learning algorithms may not officially include race as a category, they embed whiteness as a default. Facial recognition technology, for example, relies on the faces of Hollywood celebrities and university undergraduates—groups not famous for their diversity. Homophily emerged as a concept to describe white U.S. resident attitudes to living in biracial yet segregated public housing. Predictive policing technology deploys models trained on studies of predominantly underserved neighborhoods. Trained on selected and often discriminatory or dirty data, these algorithms are only validated if they mirror this data. How can we release ourselves from the vice-like grip of discriminatory data? Chun calls for alternative algorithms, defaults, and interdisciplinary coalitions in order to desegregate networks and foster a more democratic big data. Thomas A. Roesler, MD, FAAP and Carole Jenny, MD, MBA, FAAP make the case that the term Munchausen syndrome by proxy should be retired permanently and replaced with a commonsense appreciation that children can be abused by their parents in the medical environment. Physicians who find themselves providing unnecessary and harmful medical care can see the abuse for what it is, another way parents can harm children. The book offers the first detailed and comprehensive description of treatment for this form of child maltreatment. Provides an accessible account of the variety and subtlety of Greek and Roman philosophy of death, from Homer to Marcus Aurelius. Web guru Philip Greenspun offers a comprehensive look at Web publishing with techniques and examples gleaned from his experiences in developing over 70 Web services. He has added fresh ideas and insights to this thoroughly revised guide, including new chapters on electronic commerce and static site development, more material on building systems to foster community and collaboration, and new examples and case studies. Cover Title Building rich JavaScript applications that bring a desktop experience to the Web requires moving state from the server to the client side—not a simple task. This hands-on book takes proficient JavaScript developers through all the steps necessary to create state-of-the-art applications, including structure, templating, frameworks, communicating with the server, and many other issues. Throughout the book, you'll work with real-world example applications to help you grasp the concepts involved. Learn how to create JavaScript applications that offer a more responsive and improved experience. Use the Model-View-Controller (MVC) pattern, and learn how to manage dependencies inside your application Get an introduction to templating and data binding Learn about loading remote data, Ajax, and cross-domain requests Create realtime applications with WebSockets and Node.js Accept dropped files and upload data with progress indicators Use major frameworks and libraries, including jQuery, Spine, and Backbone Write tests and use the console to debug your applications Get deployment best practices, such as caching and minification The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world’s largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time. Can there be 'narrow' mental content, that is entirely determined by the goings-on inside the head of the thinker? This book argues not, and defends instead a thoroughgoing externalism: the entanglement of our minds with the external world runs so deep that no internal component of mentality can easily be cordoned off. *An NBC Today Show Book Club Pick!* *A Seventeen Magazine Best YA Book of 2018!* *A Kirkus Best YA Fantasy Book of the Year* *A We Need Diverse Books 2018 Must-Read* "Epic thrills, heart-punching romance, and a marvel of a hero" --Adam Silvera, New York Times-bestselling author of *They Both Die at the End* The people of Uztar have long looked to the sky with hope and wonder. Nothing in their world is more revered than the birds of prey and no one more honored than the falconers who call them to their fists. Brysen strives to be a great falconer—while his twin sister, Kylee, rejects her ancient gifts for the sport and wishes to be free of falconry. She’s nearly made it out, too, but a war is rolling toward their home in the Six Villages, and no bird or falconer will be safe. Together the twins must journey into the treacherous mountains to trap the Ghost Eagle, the greatest of the Uztari birds and a solitary killer. Brysen goes for the boy he loves and the glory he’s long craved, and Kylee to atone for her past and to protect her brother’s future. But both are hunted by those who seek one thing: power. In this first young-adult fantasy novel in a trilogy, Alex London launches a soaring saga about the memories that haunt us, the histories that hunt us, and the bonds of blood between us. Past compunction, expressly unbeholden, these twenty-four single-subject essays train focus on a startling miscellany of topics - Foot Washing, Dossiers, Br'er Rabbit, Housesitting, Man Roulette, the Locus Amoenus - that begin to unpack the essayist himself and his life’s rotating concerns: sex and sexuality, poetry and poetics, subject positions in American labor (not excluding academia), and his upbringing in working-class, Primitive Baptist, central-piedmont North Carolina. In Proxies an original constraint, a "total suppression of recourse to authoritative sources," engineers Brian Blanchfield’s disarming mode of independent intellection. The "repeatable experiment" to draw only from what he knows, estimates, remembers, and misremembers about the subject at hand often opens onto an unusually candid assessment of self and situation. The project’s driving impulse, courting error, peculiar in an era of crowd-sourced Wiki-knowledge, is at least as old as the one Montaigne had when, putting all the books back on the shelf, he asked, "What do I know?" The system design interview is considered to be the most complex and most difficult technical job interview by many. Those questions are intimidating, but don't worry. It's just that nobody has taken the time to prepare you systematically. We take the time. We go slow. We draw lots of diagrams and use lots of examples. You'll learn step-by-step, one question at a time. Don't miss out. What's inside? - An insider's take on what interviewers really look for and why. - A 4-step framework for solving any system design interview question. - 16 real system design interview questions with detailed solutions. - 188 diagrams to visually explain how different systems work.
