The long-awaited guide to writing long-form nonfiction by the legendary author and teacher Draft No. 4 is a master class on the writer's craft. In a series of playful, expertly wrought essays, John McPhee shares insights he has gathered over his career and has

refined while teaching at Princeton University, where he has nurtured some of the most esteemed writers of recent decades. McPhee offers definitive guidance in the decisions regarding arrangement, diction, and tone that shape nonfiction pieces, and he presents extracts from his work, subjecting them to wry scrutiny. In one essay, he considers the delicate art of getting sources to tell you what they might not otherwise reveal. In another, he discusses how to use flashback to place a bear encounter in a travel narrative while observing that “readers are not supposed to notice the structure. It is meant to be about as visible as someone’s bones.” The result is a vivid depiction of the writing process, from reporting to drafting to revising—and revising, and revising. Draft No. 4 is enriched by multiple diagrams and by personal anecdotes and charming reflections on the life of a writer. McPhee describes his enduring relationships with *The New Yorker* and Farrar, Straus and Giroux, and recalls his early years at *Time* magazine. Throughout, Draft No. 4 is enlivened by his keen sense of writing as a way of being in the world.

George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell’s Essays series, Orwell takes aim at the language used in politics, which, he says, ‘is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind’. In an age where the language used in politics is constantly under the microscope, Orwell’s *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. ‘A writer who can – and must – be rediscovered with every age.’ — *Irish Times*

Write It Right covers everyday tasks and academic writing, offering user-friendly advice on how students can make the most of simple, practical methods for tackling essays and longer pieces of work. Divided into ten sections, this guide can be used either as a course book or for individual use. Each section is informed by one or more essential ideas about how to write well. A constellation of new essays on authorship, politics and history, *British Women’s Writing in the Long Eighteenth Century: Authorship, Politics and History* presents the latest thinking about the debates raised by scholarship on gender and women’s writing in the long eighteenth century. The essays highlight the ways in which women writers were key to the creation of the worlds of politics and letters in the period, reading the possibilities and limits of their engagement in those worlds as more complex and nuanced than earlier paradigms would suggest. Contributors include Norma Clarke, Janet Todd, Brian Southam, Harriet Guest, Isobel Grundy and Felicity Nussbaum. George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the Orwell’s Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the ‘four great motives for writing’ – ‘sheer egoism’, ‘aesthetic enthusiasm’, ‘historical impulse’ and ‘political purpose’ – and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell’s mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer’s oeuvre. ‘A writer who can – and must – be rediscovered with every age.’ — *Irish Times*

This book is about how postgraduate students might choose a topic for their thesis that they can investigate and turn into a short paper or a long dissertation. The book looks at questions like the following. What should feed into their choice of a supervisor? How should they compile and

organise their bibliography and set about writing the introduction? What are some tips for writing paragraphs and entire chapters and producing conclusions? What are ways of providing references, using helpful (or at least correct) punctuation, avoiding common mistakes in spelling, and improving their level of writing? When difficulties arise for instance, with their supervisor, how might they cope with and resolve such difficulties? This book is a guide. It aims to offer straightforward suggestions about doing research, putting the results into a convincing form, and dealing with difficulties that inevitably arise. The overall objective of this book is to provide students and their supervisors with some down-to-earth proposals about things to do and things to avoid when preparing and producing a long essay or a thesis. This book is the result of many years of teaching and supervising students. Now available together as a set for a discounted price: *Writing A Successful Research Paper: A Simple Approach*, by Stanley Chodorow, with, *Writing with Sources*, (Second Edition): *A Guide for Students*, by Gordon Harvey. High school students, two-year college students, and university students all need to know how to write a well-reasoned, coherent research paper—and for decades Kate Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. In the new fourth edition of Turabian's popular guide, the team behind Chicago's widely respected *The Craft of Research* has reconceived and renewed this classic for today's generation. Designed for less advanced writers than Turabian's *Manual of Writers of Research Papers, Theses, and Dissertations*, Seventh Edition, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The *Student's Guide* is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. With the authority and clarity long associated with the name Turabian, the fourth edition of *Student's Guide to Writing College Papers* is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers. Classroom tested and filled with relevant examples and tips, this is a reference that students, and their teachers, will turn to again and again. Drawing on case studies, as well as their own extensive writing experience, the authors suggest strategies for dealing with common difficulties such as: Time and energy management Restoring flagging enthusiasm Maintaining inspiration Dealing with potential burnout and writer's block. It provides techniques and exercises for brainstorming, choosing the right approach, working with an unknown or boring assigned topic, overcoming writer's block, and selecting the best point of view. This book guides medical researchers through

all stages of transforming their scientific data and ideas into a published paper. Many researchers in medicine, including the life sciences and health sciences, struggle to get their research written and published. Manuscripts are typically rejected and/or sent back for revisions several times before ever being published. One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers: research methodology, ethics, statistics, data visualization, writing, revising, and the practicalities of publishing. Instead of wasting the reader's time discussing trivialities of punctuation, spelling, etc., this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals. The section "Preparing" covers the range of methodological, ethical, and practical aspects that researchers need to address before starting to write their paper. The section "Analyzing" reviews commonplace problems in the statistical analysis and presentation, and how to resolve those problems. The section "Drafting" describes what to write in all the various parts of a paper (the Introduction, Methods, Results, Discussion, Abstract, etc.) The section "Revising" explains and illustrates how to improve the writing style of any manuscript. The section "Publishing" discusses how to navigate the peer review process and all other practical aspects of the publishing phase. This book draws on the author's decade of experience as an independent medical writer and research consultant, but it is not written merely as the personal opinion of yet another expert. The entire book is grounded in the existing scientific and scholarly literature, with extensive references and a lengthy annotated bibliography, so readers can quickly obtain more information on any aspect they want. Thus this book provides a more evidence-based, scholarly account of how medical scientific papers should be written, in order to improve medical communication and accelerate scientific progress. After reading this entire book cover to cover, medical researchers will know how to write better quality medical papers, and they will be able to publish their work in better journals with less time and struggle. This book is essential reading for anyone conducting research in clinical medicine, life sciences, or health sciences. One of our most vital and incisive writers on literature, feminism, and knowing one's self For nearly fifty years, Vivian Gornick's essays, written with her characteristic clarity of perception and vibrant prose, have explored feminism and writing, literature and culture, politics and personal experience. Drawing writing from the course of her career, *Taking a Long Look* illuminates one of the driving themes behind Gornick's work: that the painful process of understanding one's self is what binds us to the larger world. In these essays, Gornick explores the lives and literature of Alfred Kazin, Mary McCarthy, Diana Trilling, Philip Roth, Joan Didion, and Herman Melville; the cultural impact of *Silent Spring* and *Uncle Tom's Cabin*; and the characters you might only find in a New York barber shop or midtown bus terminal. Even more, *Taking a Long Look* brings back into print her incendiary essays, first published in the *Village Voice*, championing the emergence of the women's liberation movement of the 1970s. Alternately crackling with urgency or lucid with insight, the essays in *Taking a Long Look* demonstrate one of America's most beloved critics at her best. Each unit features succinct, user friendly, self-contained lessons. Models of student essays enhance learners' comprehension of writing modes. An extensive, yet structured writing task is included in every unit. Specific rhetorical focus and language focus points are presented and practised in each unit. At level 1, students review the structure of English sentences and learn about the mechanics of writing

academic paragraphs. At level 2, they focus on the short essay, and at level 3, they are introduced to longer academic essays. This work takes a refreshing approach to the academic writing course, providing easily understandable language set within a clear structure.
