From the Ground Up Jun 15 2023 HOW TO BUILD YOUR BUSINESS FAST. EVERY BUSINESS OWNER SHOULD READ THIS BOOK. HOW DO YOU MAKE YOUR STORY A SUCCESS? HOW DO YOU TAKE A NEAR BROKEN BUSINESS TO GREAT HEIGHTS? HOW CAN YOU BUILD A BUSINESS THAT LASTS? WHERE DO YOU EVEN START? If you are a start up business owner, or a business professional, established or up-and-coming leader, a migrant wanting to make your dreams come true in a new country, you want to see your business flourish long into your future, or if you want to align your people for growth and a great culture, the principles in this book will help you achieve all your dreams. From migrant to door-to-door salesman to award winning CEO, this personal and raw glimpse into Sunil Kumar’s journey shares with you his seven key principles that will help your business thrive to success. Sunil’s message is clear: there is no limit to what you can achieve if you: Nurture self-empowerment, Build a strong foundation, Embrace generosity of spirit, Be courageous and take risks, Build a strong foundation. Join Sunil if you want to discover that success is in all of us as long as we believe with bravery.

From the Ground Up Nov 08 2022 Viola MacMillan was a mining dynamo, a legend in the testosterone-driven, wheeling-dealing venture that is Canadian mining. In this rags-to-riches autobiography, MacMillan offers a passionate account of her life in the bush, her rise to fame, and the setbacks she endured along the way. To put the story in context, Virginia Heffernan provides a snapshot of the Canadian mining industry during MacMillan’s heyday, including the events that led to her jail sentence and eventual pardon.

SystemC: From the Ground Up, Second Edition Nov 27 2021 SystemC provides a robust set of extensions to the C++ language that enables rapid development of complex models of hardware and software systems. The authors focus on practical use of the language for modeling real systems, showing: A step-by-step build-up of syntax Code examples for each concept Updates to reflect the SystemC standard, IEEE 1666 Why features are as they are Many resource references How SystemC fits into an ESL methodology This new edition of an industry best seller is updated to reflect the standardization of SystemC as IEEE 1666 and other improvements that reflect feedback from readers of the first edition. The wide ranging feedback also include suggestions from editors of the Japanese and Korean language translations, professors and students, and computer engineers from a broad industrial and geographical spectrum, all who have successfully used the first edition. New chapters have been added on the SystemC Verification Library and the Transaction Level Modeling, and proposed changes to the current SystemC standard. David Black and Jack Donovan, well known consultants in the EDA industry, have teamed with Bill Bunton and Anna Keist, experienced SystemC modeling engineers, to write the second edition of this highly popular classic. As a team the authors bring over 100 years of ASIC and system design experience together to make a very readable introduction to SystemC.

Ray Tracing from the Ground Up May 02 2022 With the increase in computing speed and due to the high quality of the optical effects it achieves, ray tracing is becoming a popular choice for interactive and animated rendering. This book takes readers through the whole process of building a modern ray tracer from scratch in C++. All concepts and processes are explained in detail with the aid of extensive code examples. From the Ground Up Sep 06 2022 Michaela Welti’s story starts as a little girl born in Switzerland just as the Nazi party came to power in Germany, and the whole of Europe was plunged into war when she was six. With the sound of the guns at the front closely, Michaela’s father made a hazardous journey from Dunkirk to East Germany to reach them, and they made their escape to Switzerland through a ruined Germany. Years later, in her twenties, Michaela started to think of marriage. The prospects of a likely partner in her village seemed remote, and Michaela took the radical step of advertising in a magazine that specialized in matchmaking! Little did she realize that her future husband would read her ad in a mining camp on Vancouver Island, miles away on the West Coast of Canada. Michaela stepped off the plane in Vancouver, BC on November 25, 1957, age 24, to meet her new husband, Max Welti and were married within ten days. In time, their dreams lead them to a successful life in organic farming. The love of the Weltis for each other, for nature, the plants and the earth, and for God who created it, are vividly portrayed in Michaela’s story.

From the Ground Up May 22 2021 “Everyone in a hospital leadership role should read this book as it offers a wealth of practical advice for organizations intent on improving their clinical care delivery.” —Amy C. Edmondson, professor, Harvard Business School, and author of The Fearless Organization All Americans deserve and should have access to high quality, affordable healthcare services delivered by professionals who have sufficient time and resources to care for them. This book offers proven and practical approaches for redesigning healthcare organizations to be less fragmented—and more patient-centered—by tapping into the experiences of staff on the front lines of patient care. Peter Lazes and Marie Rudden show how collaboration and active communication among administrators, medical staff, and patients are a core element of a successful organizational change effort. Through case studies and the direct voices and experiences of frontline workers, they explore exactly what it takes to effectively engage staff and providers in improving the patient care shortcomings within their institutions. This book not only is a manual detailing what can be achieved when frontline staff have a direct voice in controlling their practice environments but was written to show how to accomplish transformative changes in how our hospitals and outpatient clinics work. At a time when the massive gaps in our healthcare systems have been laid bare by the fragmented responses to the COVID-19 pandemic, this book offers hope and a plan for change.

From the Ground Up Jun 22 2021 With America’s economic future at times both uncertain and encouraging, this penetrating study looks beyond the headlines and the theories to the dynamic new entrepreneurs and innovative companies that are re-defining American business. Case highlights the pioneers of new ideas and new management techniques who are setting a bold new course for our future.

From the Ground Up Apr 08 2020 Basic from the Ground Up Aug 13 2020 Rome from the Ground Up Jan 10 2023 Rome is not one city but many, each with its own history unfolding from a different center: now the trading port on the Tiber; now the Forum of antiquity; the Palatine of imperial power; the Lateran Church of Christian ascendency; the Vatican; the Quirinal palace. Beginning with the very shaping of the ground on which Rome first rose, this book conjures all these cities, past and present, conducting the reader through time and space to the complex and shifting realities—architectural, historical, political, and social—that constitute Rome. A multifaceted historical portrait, this richly illustrated work is as gritty as it is gorgeous, immersing readers in the practical world of each period. James H. S. McGregor’s explorations afford the pleasures of a novel thick with characters and plot twists: amid the life struggles, hopes, and failures of countless generations, we see how things truly worked, then and now; we learn about the materials of which Rome was built; of the Tiber and its bridges; of roads, aqueducts, and sewers; and, always, of power, especially the power to shape the city and imprint it with a particular personality—like that of Nero or Trajan or Pope Sixtus V—or a particular institution. McGregor traces the successive urban forms that rulers have imposed, from emperors and popes to national governments including Mussolini’s. And, in archaeologists’ and museums’ presentation of Rome’s past, he shows that the documenting of history itself is fraught with power and politics. In McGregor’s own beautifully written account, the power and politics emerge clearly, manifest in the distinctive styles and structures, practical concerns and aesthetic interests that constitute the myriad Romes of our day and days past.

From the Ground Up Aug 05 2022 The tsunami that struck a dozen countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous natural disaster. The international relief effort broke all records both in scale and diversity, with seven billion U.S. dollars donated from all over the world through public and private agencies for Sumatra alone. Simply as a reconstruction effort, therefore, the disbursement of those funds and the rebuilding of housing,
infrastructure, and economy posed major national and international challenges. However this was not simply a reconstruction effort. Aceh at that time was a war zone, with Indonesia’s military engaged in a major operation to crush a separatist rebellion that had simmered since 1976. Even though the funds had been donated for tsunami relief, any real reconstruction of Aceh had to consider the impact of the conflict on the well-being of the population, as well as governance and administrative capacities. This volume serves the purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes, but also of maintaining critical links between Aceh and the international community after the initial tranche of aid expire.

The View from the Ground Aug 25 2021 An anthology spanning six decades of on-the-scene journalism from "one of the most eloquent witnesses of the twentieth century" (Bill Buford, Granta). For nearly sixty years, Martha Gelhorn traveled the globe to report on the tumult and extremity of life in the twentieth century. The View from the Ground, as Gelhorn explains, "is a selection of articles written during six decades, peace-time and reporting. That is to say, the countries in the background were at peace at the moment of writing. No World War II was raging either. The dates are therefore only a rough indication of how long ago they were written." Included here are Gelhorn's behind-the-scenes accounts of Depression-era France, the Spanish Civil War, and Gelhorn's return to Cuba after a forty-one-year absence—among many other topics. Informed by the horrors of fascism in Spain and Germany, the modern terror in Central America, and by the courage of those who stand up to the thugs both in an out of government, The View from the Ground is a singular act of testimony that, like its companion volume, The Face of War, is "an eloquent, unforgetable history of a chaotic century" (San Francisco Chronicle). Location Estimation from the Ground Oct 15 2020 The location of an object can often be determined from indirect measurements using a process called estimation. This book explains the mathematical formulation of location-estimation problems and the statistical properties of these mathematical models. It also presents algorithms that are used to resolve these models to obtain location estimates, including the simplest linear models, nonlinear models (location estimation using satellite navigation systems and estimation of the signal arrival time from those satellites), dynamical systems (estimation of an entire path taken by a vehicle), and models with integer ambiguities (GPS location estimation that is centimeter-level accurate). Location Estimation from the Ground Up clearly presents analytic and algorithmic topics not covered in other books, including simple algorithms for Kalman filtering and smoothing, the solution of separable nonlinear optimization problems, estimation with integer ambiguities, and the implicit-function approach to estimating covariance matrices when the estimator is a minimizer or maximizer. It takes a unified approach to estimation while highlighting the differences between classes of estimation problems. The only book on estimation written for math and computer science students and graduates, it includes problems at the end of each chapter, many with solutions, to help readers deepen their understanding of the material and guide them through small programming projects that apply theory and algorithms to the solution of real-world location-estimation problems. The book's core audience consists of engineers, including software engineers and algorithm developers, and graduate students who work on location-estimation projects and who need help translating the theory into algorithms, code, and deep understanding of the problem in front of them. Instructors in mathematics, computer science, and engineering may also find the book of interest as a primary or supplementary text for courses in location estimation and navigation.

C++ from the Ground Up Mar 08 2020 Beginning through advanced topics and techniques are covered in this reference. The book teaches how to program C++ by presenting examples of source code and showing the results that such code produces. Readers are encouraged to experiment with the code to gain firsthand experience.

Book from the Ground Jul 16 2023 A book without words, recounting a day in the life of an office worker, told completely in the symbols, icons, and logos of modern life. Twenty years ago I made Book from the Sky, a book of illegible Chinese characters that no one could read. Now I have created Book from the Ground, a book that anyone can read. —Xu Bing Following his classic work Book from the Sky, the Chinese artist Xu Bing presents a new graphic novel—one composed entirely of symbols and icons that are universally understandable. Xu Bing spent seven years gathering materials, experimenting, revising, and arranging thousands of pictograms to construct the narrative of Book from the Ground. The result is a readable story without words, an account of twenty-four hours in the life of “Mr. Black,” a typical urban white-collar worker. His day begins with wake-ups calls from a nearby bird and his bedside alarm clock; it continues through tooth-brushing, coffee-making, TV-watching, and cat-feeding. He commutes to his job on the subway, works in his office, ponders various fast-food options for lunch, waits in lines for the bathroom, daydreams, sends flowers, socializes after work, goes home, kills a mosquito, goes to bed, sleeps, and gets up the next morning to do it all over again. His day is recounted with meticulous and intimate detail, and reads like a postmodern, post-textual riff on James Joyce’s account of Bloom’s peregrinations in Ulysses. But Xu Bing’s narrative, using an exclusively visual language, could be published anywhere, without translation or explication; anyone with experience in contemporary life—anyone who has internalized the icons and logos of modernity, from smiley faces to transit maps to menus—can understand it.

raised from the ground: 12 2023 This early work is deeply personal and José Saramago’s most autobiographical, following the varying fortunes of the Mau-Tempo family â€” poor, landless peasants not unlike the authorâ€™s own grandparents. Saramago charts the family’s lives in Avenjo, southern Portugal, as national and international events rumble on in the background â€” the coming of the republic in Portugal, the First and Second World Wars, and an attempt on the dictator Salazar’s life. Yet, nothing really impinges on the farm labourers’ lives until the first stirrings of communism. As full of love as it is of pain, it is a vivid, moving tribute to the men and women among whom Saramago lived as a child.

Our Women on the Ground Sep 25 2021 ‘Determination, grit and humour shine through’ Lindsey Hilsum, Observer Nineteen Arab women journalists speak out about what it’s like to report on their changing homelands in this first-of-its-kind essay collection. A growing number of intrepid Arab and Middle Eastern Sahafiyat – female journalists – are working tirelessly to shape nuanced narratives about their changing homelands, often risking their lives on the front lines of war. Here, nineteen of these women tell us, in their own words, about what it’s like to report on conflicts that (quite literally) hit close to home. Their daring and heartfelt stories, told here for the first time, shatter stereotypes about the region’s women and provide an urgently needed perspective on a part of the world that is frequently misunderstood. With a foreword by CNN chief international anchor Christiane Amanpour.

Paris from the Ground Jun 03 2022 Paris is the most personal of cities. There is a Paris for the medievalist, and another for the modernist!Na Paris for ex-patrists, philosophers, artists, romantics, and revolutionaries of every stripe. James H. S. McGregor brings these multiple perspectives into focus throughout this concise, unique history of the City of Light. His panorama begins with an ancient Gallic fortress on the Seine, burned to the ground by its own defenders in a vain effort to starve out Caesar’s legions. After ninth-century raids by the Vikings ended, Parisians expanded the walls of their tiny sanctuary on the Île de la Cité, turning the river Îs right bank into a thriving commercial district and the Rive Gauche into a college town. Gothic spires expressed a decorative architectural novelty, matched only by the palaces and pleasure gardens of successive monarchs whose ingenuity made Paris the epitome of everything.
French. The fires of Revolution threatened all that had come before, but Baron Haussmann saw opportunity in the wreckage. No planned city in the world is more famous than his. Paris from the Ground Up allows readers to trace the city's evolution in its architecture and art from the Roman arena to the Musée d'Orsay, from the Louvre's classical foundations to I. M. Pei's transparent pyramids. Color maps, along with identifying illustrations, make city accessible to visitors by foot, Metro, or riverboat.

From the Ground Up Feb 28 2022 "Grassroots social-change organizations are a critical resource for progressive movement-building in the United States. They provide political education and sites for constituent engagement, and they are beginning to create networks across issues and/or communities; they promote home-grown leadership among groups that have been disadvantaged; they contribute to a shared understanding of the problems of inequality and injustice; and they offer a public space for the dialogue needed to identify common principles."—From the Ground Up From community organizing for affordable housing in neglected neighborhoods to providing antiviolence training for youth or litigating for the rights of sex workers, grassroots organizations are engaged in energetic efforts to increase the power of marginalized communities and organizations across the United States, but little has been written about the details of their operations. From the Ground Up takes a close look at how social-change organizations address challenges related to leadership, staff development, decision-making, resource needs, and collaborations. Carol Chetkovich and Frances Kunreuther, both experienced nonprofit managers, draw on their in-depth interviews with leaders and staff members from sixteen diverse social-change organizations to provide a detailed analysis of these groups and their activities. They note that even working in isolation, these organizations make important contributions to justice in their communities; together they might form the base of a larger progressive movement for change.

From the Ground Up Feb 16 2021 Leadership from the Ground Up Apr 01 2022 This book chronicles the journey of seven schools serving students of poverty, English Language Learners (ELLs), and students of color, which were able to sustain school improvement and increase student achievement. The book stories of these seven schools and demonstrates that it takes an entire school working together with their communities, adding to the social and cultural capital of their students and families, to create and nurture what we call a Learning Partnership for sustainable school improvement. The answers for how these schools sustained school improvement and are effective schools is evident from their school student metrics that validate the school's ability to meet and sustain external mandates of high performance over time. The seven individual case stories illustrate what matters most is what happens in the school itself. It is the internal culture of caring and respecting each other and working from an additive perspective of valuing students for their unique gifts and abilities, rather than exclusively focusing on increasing test scores that makes these school stories unique. This is not about heroic leadership but leadership spread out and shared among professionals working together to achieve common goals around shared values and beliefs. This book is about using resources in ways that value human capital as the greatest asset in the school to ensure that educators feel a sense of commitment, connection, and passion for their work together with students, their families, and their communities that enable them to excel together. We offer readers seven cases that demonstrate there is no cookie cutter approach to having an effective school. Rather, there is a theory-in-practice that grounds the Learning Partnership depicted as a tree within a sustainable school improvement culture. This sustainable culture connects shared leadership and accountability, resourcefulness, a humanistic philosophy, additive schooling and results in an organization synergy that sustains organizational and collective efficacy for achieving results in these schools that other educators in schools with similar demographics are often unable to sustain or attain.

Cure from the Ground Up Oct 27 2021 Venice came to life on mudflats at the edge of the habitable world. Protected in a tidal estuary from invaders and Byzantine overlords, the fishermen and traders who settled there crafted a way of life unlike anything the Roman Empire had ever known. In an astonishing feat of narrative history, James H. S. McGregor recreates this world, with its waterways rather than roads and its livelihood harvested from the sea. The narrative follows both a chronological and geographical organization, so that readers can trace the city’s evolution by chapter and visitors can explore it by district on foot and by boat.

From the Ground Up Dec 09 2022 NEW YORK TIMES BESTSELLER • From the longtime CEO and chairman of Starbucks, a bold, dramatic work about the new responsibilities that leaders, businesses, and citizens share in American society today—as viewed through the intimate lens of one man’s life and work. What do we owe one another? How do we channel our drive, ingenuey, even our pain, into something more meaningful than individual success? And what is our duty in the places where we live, work, and play? These questions are at the heart of the American journey. They are also ones that Howard Schultz has grappled with personally since growing up in the Brooklyn housing projects and while building Starbucks from eleven stores into one of the world’s most iconic brands. In From the Ground Up, Schultz looks for answers in two interwoven narratives. One story shows how his conflicted boyhood—including experiences he has never before revealed—motivated Schultz to become the first in his family to graduate from college, then to build the kind of company his father, a working-class laborer, never had a chance to work for: a business that tries to balance profit and human dignity. A parallel story offers a behind-the-scenes look at
Schultz’s unconventional efforts to challenge old notions about the role of business in society. From health insurance and free college tuition for part-time baristas to controversial initiatives about race and refugees, Schultz and his team tackled societal issues with the same creativity and rigor they applied to changing how the world consumes coffee. Throughout the book, Schultz introduces a cross-section of Americans transforming common struggles into shared successes. In these pages, lost youth find first jobs, aspiring college students overcome the yoke of debt, post-9/11 warriors replace lost limbs with indomitable spirit, former coal miners and opioid addicts pave fresh paths, entrepreneurs jump-start dreams, and better angels emerge from all corners of the country. From the Ground Up is part candid memoir, part uplifting blueprint of mutual responsibility, and part proof that ordinary people can do extraordinary things. At its heart, it’s an optimistic, inspiring account of what happens when we stand up, speak out, and come together for purposes bigger than ourselves. Here is a new vision of what can be when we try our best to lead lives through the lens of humanity. "Howard Schultz’s story is a clear reminder that success is not achieved through individual determination alone, but through partnership and community. Howard’s commitment to both have helped him build one of the world’s most recognized brands. It will be exciting to see what he accomplishes next."—Bill Gates

Gravity from the Ground Up May 14 2023 This book invites the reader to understand our Universe, not just marvel at it. From the clock-like motions of the planets to the catastrophic collapse of a star into a black hole, gravity controls the Universe. Gravity is central to modern physics, helping to answer the deepest questions of the nature of time, the origin of the Universe and the unification of the forces of nature. Linking key experiments and observations through careful physical reasoning, the author builds the reader’s insight step-by-step from simple but profound facts about gravity on Earth to the frontiers of research. Topics covered include the nature of stars and galaxies, the mysteries of dark matter and dark energy, black holes, gravitational waves, inflation and the Big Bang. Suitable for general readers and for undergraduate courses, the treatment uses only high-school level mathematics, supplemented by optional computer programs, to explain the laws of physics governing gravity. Kiss the Ground Apr 20 2021 Pre-publication subtitle: A food revolutionary’s guide to reversing climate change.

The Book about Xu Bing’s Book from the Ground Apr 13 2023 The creation of Xu Bing’s Book from the Ground documented and described in text, images, and photographs. Although the pictogram-only narrative in Xu Bing’s Book from the Ground can be read by anyone, there is much more to the story of Xu Bing’s wordless book than can be gleaned from icons alone. This companion volume to Book from the Ground chronicles the entire project, mapping the history of Xu Bing’s novel creation from inspiration to exhibition to publication. In the 1980s, Xu Bing created Book from the Sky. Using garbled and nonsensical faux-Chinese characters, this installation expressed Xu’s doubts about written language and provoked questions about the Chinese language. Thirty years later, with Book from the Ground, the artist expresses his hope for a single, universally understood language. Inspired by airport signs that communicate instantaneously through images—directing a temporary community of modern nomads where to eat, shop, sit, and find a bathroom—Xu began to collect images, icons, and logos from which he could construct a story. This book describes Xu’s research, showing notebook pages and bulletin boards full of clipped-out images; offers commentary by the artist and discussions of reading, alphabets and languages; documents, with text and photographs, exhibitions and installations connected to the work (including a Book from the Ground pop-up concept store); provides a list of works; describes Xu’s “icon lab”; and “translates” Xu’s pictographic narrative into English.
