In the ten years since its coming into force, the Alternative Investment Fund Managers Directive (AIFMD), with almost EUR 7 trillion assets under management in its remit, has become an important piece of European regulation complementing the Undertakings for Collective Investment in Transferable Securities (UCITS) and the Markets in Financial Instruments (MiFI) frameworks. This third edition of the most comprehensive and in-depth analysis of the AIFMD and its related European investment fund legislation (including the European Venture Capital Fund Regulation, the European Social Entrepreneurship Fund Regulation, the European Long-Term Investment Fund Regulation and the European Money Market Fund Regulation among others) brings together fund industry experts, fund supervisors, consultants, lawyers and academics to discuss the content and system of the directive from every angle, including its relation not only to the UCITS and MiFI frameworks but also to pension funds, the Sustainable Finance Disclosure Regulation, the Securitization Regulation and the Cross Border Funds Distribution Directive and Regulation, as well as related pieces of tax regulation at the European level. Further, the third edition emphasizes the function of such factors in the financial services value chain as the following: the AIFMD's approach to robo-advisors; digital asset funds; infrastructure investments in the context of real estate and sustainable investments; risk management; transparency; and impact on alternative investment

strategies. Five country reports, focusing on the European Union's five most important financial centres for alternative investment funds, deal with the potential interactions among the AIFMD and the relevant laws and regulations of France, Germany, Luxembourg, Ireland and The Netherlands. This thoroughly updated edition elaborates on potential difficulties encountered when applying the directive and provides potential solutions to the problems it raises. The book is sure to be warmly welcomed by fund lawyers and consultants, investors and their counsels, fund managers, depositaries, asset managers and administrators, as well as regulators and academics in the field. This book provides original, diverse, and timely insights into the nature, scope, and implications of Artificial Intelligence (AI), especially machine learning and natural language processing, in relation to contracting practices and contract law. The chapters feature unique, critical, and in-depth analysis of a range of topical issues, including how the use of AI in contracting affects key principles of contract law (from formation to remedies), the implications for autonomy, consent, and information asymmetries in contracting, and how AI is shaping contracting practices and the laws relating to specific types of contracts and sectors. The contributors represent an interdisciplinary team of lawyers, computer scientists, economists, political scientists, and linguists from academia, legal practice, policy, and the technology sector. The chapters not only engage with salient theories from different disciplines, but also examine current and potential real-world applications and implications of AI in contracting and explore feasible legal, policy, and technological responses to address the challenges presented by AI in this field. The book covers major common and civil law jurisdictions, including the EU, Italy, Germany, UK, US, and China. It should be read by anyone interested in the complex and fast-evolving relationship between AI, contract law, and related areas of law such as business, commercial, consumer, competition, and data protection laws. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. For adults. There is a pressing need for methodologically sound RCTs to confirm whether such interventions are helpful and, if so, for whom.
