Beyond the NICU: Comprehensive Care of the High-Risk Infant

Publisher’s Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Improve medical and developmental outcomes in high-risk infants with evidence-based management strategies. Beyond the NICU is the first book to deliver practical, evidence-based strategies for healthcare providers caring for the NICU graduate during convalescence and after discharge. It is a guide to the successful transition of a high-risk infant from intensive care to the intermediate-level nursery, and then, to help the child thrive outside of the
hospital in a home environment. To advance the standard of care of these vulnerable patients, Beyond the NICU draws together clinically focused guidelines to improve patient outcomes and reduce hospital readmissions. Drawing on an international team of respected authorities, Beyond the NICU provides the strategies necessary to ensure the success of convalescing NICU graduates in both inpatient and outpatient settings. Doody's Review! Score: 95/100 Description This is a nearly 1,000-page softcover book written by over 100 contributors on convalescent neonatal care and post-discharge care of the high-risk infant. The format is similar to other neonatal handbooks (Neonatology: Management, Procedures, On-Call Problems, Diseases, and Drugs, 7th edition, Gomella, et al. (McGraw-Hill, 2013); Manual of Neonatal Care, 7th edition, Cloherty et al. (Lippincott Williams & Wilkins, 2011)), but it emphasizes transitional care of the sick infant. Purpose The purpose is to provide "practical, evidence-based strategies for the NICU graduate during convalescence and after discharge." The book functions like a practical handbook for clinicians in the NICU, covering almost all aspects of neonatal care, but emphasizing convalescent care. This is an area that has not been well covered in other neonatal books, and this book meets the objectives. Audience The audience is NICU caregivers at all levels and of all disciplines. The book is written in outline format and emphasizes care rather than pathophysiology. The senior editor, his three consultants, and many of the contributors are recognizable names in the field. Features The 51 chapters are grouped into four sections. After an introductory section which includes chapters on the role of the primary care provider for the NICU graduate, the book covers most aspects of care of preterm and term infants in the next two sections. A final section on developmental care includes chapters on early intervention and palliative care. Although the book is supposed to emphasize convalescent and post-discharge care, much of the second and third sections deals with standard early diagnosis and treatment of common neonatal issues, which adds significant length to the book. The book is at its best when it sticks to its title and emphasizes care "beyond the NICU." Helpful appendixes include discharge checklists, home equipment, and even billing coding for the NICU graduate. Illustrations and tables are sparse, but some are unique and very helpful. Assessment This is a unique neonatal book in its emphasis on convalescent and post-discharge care for the sick neonate. It should become a standard text for clinicians in this field and, as it matures in subsequent editions, should abbreviate the acute care sections and concentrate on its title.

Doing the Right Thing Apr 09 2020 Now in paperback, one of the first books to help navigate the profound emotional challenges of caring for elderly parents in a
strained parent-child relationship.

There's No Place Like Home: Place and Care in an Ageing Society Apr 21 2021 Against a background of debate around global ageing and what this means in terms of the future care need of older people, this book addresses key concerns about the nature and site of care and care-giving. Following a critical review of research into who cares, where and how, it uses geographical perspectives to present a comprehensive analysis of how the intersection of informal care-giving
within domestic, community and residential care homes can create complex landscapes and organizational spatialities of care. Drawing on contemporary case studies largely, but not exclusively from the UK, the book reviews and develops a theoretical basis for a geographical analysis of the issue of care. By relating these theoretical concepts to empirical data and case studies it illustrates how formal and informal care-giver responses to the changing landscape of care can act to facilitate or constrain the development of inclusionary models of care.

Patient Safety and Quality Jul 05 2022 "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, http://www.ahrq.gov/qual/nurseshdbk/

Take Care of Yourself! Jul 13 2020 When Helen, a kindergarten teacher, entered her class with a huge bag instead of her usual books, children right away realized that something different and important was going to take place that day. Parents and educators usually find it difficult to initiate a discussion about sensitive subjects such as private parts. This story, through engaging and provoking children’s curiosity, provides definitions and clarification on some of the related concepts, such as good touches and bad touches, good secrets and bad secrets, and how to tell the difference. The story also educates children to be aware of their feelings and trust them. This is especially important as the analytical mind is not yet developed in those tender ages, and a child has to primarily rely on his or her feelings to assess a situation and act accordingly. The book also educates children what to do when facing an uncomfortable situation. 3

Your Foundation in Health & Social Care Sep 14 2020 Your Foundation in Health & Social Care provides readers with all the knowledge and skills necessary for effective learning at Foundation level, both in study and the
workplace. It explores all the key areas of the Foundation Degree, including: - critical analysis and practice - communication - work placement skills - psychology Each chapter features case studies to translate theory into real-life practice, activities to challenge readers, and further reading so that students can develop their understanding. This is an essential companion for those studying foundation degrees across health and social care, and also valuable reading for students at higher education level.

The Institutional Care of the Insane in the United States and Canada Mar 09 2020 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Care of the Acutely Ill Adult May 15 2023 Care of the Acutely Ill Adult equips all nurses with the knowledge and skills to care for deteriorating patients in the clinical environment. With its unique system-based approach, this key book emphasizes systematic assessment, careful monitoring, and timely escalation, and is essential reading for all nurses working in acute care settings.

How to Take Care of the Children Oct 08 2022

Baby Bird Caring Guide Oct 16 2020 Raising a wild baby bird on your own is not recommended by animal care professionals. If you must though, it is key to have a secure home for the baby bird, food, and proper health care and handling. Raising a baby bird requires a lot of time, materials and dedication, and just because you do this does not necessarily mean that the bird will tame and not fly away in the future.

Advice to Women on the Care of the Health Before, During and After Confinement Aug 26 2021

Labours of Love Mar 13 2023 We're facing a crisis in care likely to affect every one of us over the course of our lives. Care-work is underpaid; its values disregarded. Britain's society lauds economic growth, productivity and profit over compassion, kindness and empathy. For centuries the caring labours of women have been taken for granted, but with more women now in work, with increasing
numbers of elderly and with austerity dismantling the welfare state, care is under pressure as never before. Over five years, Madeleine Bunting travelled the country, speaking to charity workers, doctors, social workers, in-home carers, nurses, palliative care teams and parents, to explore the value of care, the hidden glue that binds us together. She finds remarkable stories, in GP surgeries, in work undertaken by parents for their disabled children and in end-of-life teams, that conjure a different way of imagining our society and the connections between us. Blending these revelatory testimonies with a history and language of care, and with Bunting's own experiences of caring for the young and old in her family, Labours of Love is a hugely important portrait of our nation today - and of how it might be - which raises a clarion call for change.

The Care of Books Jul 17 2023
The Care and Wellbeing of Older People Jan 31 2022 "The Care and Wellbeing of Older People" is aimed at all those training and taking courses relating to the healthcare of older people. This could mean pre- and post-registration students in universities and colleges as well as practitioners in hospitals and care homes. The book will relate to UK standards and competencies (e.g. Skills for Health and Skills for Care competencies) relating to the care and wellbeing of Older People. The book is suitable for students in Scotland, England, Wales and Northern Ireland. Student learning is supported by case studies, activities, a glossary, references and further reading. Covering a wide range of topics in primary and secondary care, this contributed volume provides a comprehensive exploration of the current issues and challenges involved in the care of older people. With a focus on the user's experience of care and the implications for joint working, the textbook includes chapters on subjects such as: Values; Communication; Advocacy and rights; Interprofessional working; Protecting vulnerable adults; Promoting physical and mental health and wellbeing; Life in care; Palliative care; Social networks. Foreword by Priscilla Ebersole, RN, PhD, FAAN, Professor Emerita, San Francisco State University, San Francisco, CA, USA."

Everyday Self-Care Jun 16 2023 Discover why time spent caring for yourself is always time well spent, and the countless ways you can improve your health, happiness, and wellbeing. When life is busy, it’s easy to put yourself at the bottom of the to-do list and neglect your own needs. If this continues for a
prolonged period of time, it will take its toll on your mental and physical health, which will ironically impact on those loved ones you’re trying to care for, or that job you’ve been so committed to. This little book of self-care isn’t about overnight transformation or a huge lifestyle makeover; it’s about implementing small changes that will gradually improve your physical and emotional wellbeing. Do you need to sleep better and eat healthier foods? Are you in need of an energy boost or perhaps you struggle to wind down and relax? Are you a worrier? Do you get caught in a negative spiral of thinking? Does the clutter in your home get you down? Are you overwhelmed with commitments and looking for more balance? Whatever you need to work on, you’ll find advice and inspiration inside this handy guide.

Who Cares? Jun 04 2022 Are you caring for a loved one, often feeling stressed with little time to yourself? Would you like to regain balance and enjoy life? Most carers fall either mentally or physically unwell from the pressures of caring. So many issues can arise. Sara cared for her husband for 13 years after he was diagnosed with a brain tumour. After falling ill from the stress of caring, she then discovered new ways not only to regain her health, but to start enjoying life again. This book can help anyone caring for a loved one. It gives practical know-how, guiding you to make the right choices to safeguard your own health and wellbeing whilst caring. There are so many ways that you can make positive changes to your daily life—the smallest of tweaks can make the biggest of differences, radically transforming your life and the life of the person you care for. In sharing her own stories and the case studies of other carers, Sara helps you discover the crucial steps to wellbeing whilst caring, so that you can enjoy your life guilt free. This book is an inspiring and empathetic guide to staying healthy and happy whilst caring. We all deserve to enjoy our lives—and so do you.

American Red Cross Text-Book on Home Hygiene and Care of the Sick Mar 01 2022 To the woman who wishes to protect her family from preventable diseases and is anxious to fit herself in the absence of a trained nurse to give intelligent care to those who are sick, this revision of the Red Cross text-book on Elementary Hygiene and Home Care of the Sick is particularly directed. It should appeal to men and to women who are interested in maintaining the health of their neighborhoods and communities and in affording effective cooperation to the public health authorities. Show Excerpt; and to describe some elementary methods of caring for the sick, which, however simple, are essential to comfort, and sometimes indeed to ultimate recovery.
