Covering the theory of computation, information and communications, the physical aspects of computation, and the physical limits of computers, this text is based on the notes taken by one of its editors, Tony Hey, on a lecture course on computation given by Last Lectures on the Prevention and Intervention of Genocide is a collection of hypothetical 'last lectures' by some of the top scholars and practitioners across the globe in the fields of human rights and genocide studies. Each lecture purportedly constitutes the last thing the author will ever say about the prevention and intervention of genocide. The contributions to this volume are thought-provoking, engaging, and at times controversial, reflecting the scholars' most advanced thinking about issues of human rights and genocide. This book will be of great interest to professors, researchers, and students of political science, international relations, psychology, sociology, history, human rights, and genocide studies. *The Last Dance: Encountering Death and Dying* provides a comprehensive, up to date, and readable introduction to the study of death and dying. It directs attention to the evolving understanding of death and dying in today's culturally diverse environment. In a straightforward, conversational style, with an extensively illustrated format, *The Last Dance* provides a solid grounding in theory and research as well as in methods for applying what is learned to readers' own circumstances, both personal and professional. No other textbook so successfully combines the research and theories of such diverse disciplines as anthropology, art, ethics, health science, literature, philosophy, psychology, public policy, religion, and sociology. The eleventh edition of *The Last Dance* includes coverage of key topics yet retains the focus, writing, and pedagogy instructors have come to expect from the best-selling text in death studies. "Written by three experts in the field, *Deep Learning* is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX *Deep learning* is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. *Deep Learning* can

be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. In 2005 Steve Jobs gave his first and only 'commencement address' - a lecture given to the graduating class at Stanford University in the US, an audience of 23,000 students. This lecture was to be the most famous such address and resulted in 26 million viewers once it hit the web. It was an opportunity for Jobs to pause and reflect, to provide a personal and professional summation of his remarkable life. Steve Jobs Life By Design, is based on this lecture, with the author, George Beahm connecting the dots and providing the examples, context and perspective from Jobs' life to expand on each lesson. George Beahm is a New York Times bestselling author. Beahm has also published more than thirty books on popular culture subjects, including Michael Jordan, J.K. Rowling, Philip Pullman, C.S. Lewis, J.R.R. Tolkien, Indiana Jones, Anne Rice, Patricia Cornwell, the Big Bang Theory television show, Caribbean Pirates, censorship, and Stephen King (several books). Among his most recent books is I, Steve: Steve Jobs in His Own Words which debuted on the New York Times bestseller list at #3, and has sold more than two dozen foreign language editions. Its worldwide success led to a line of business-related quote books on media mogul Rupert Murdoch, Facebook's Mark Zuckerberg, and the Google co-founders, Sergey Brin and Larry Page. The book focuses on identifying your own leadership strengths to get success. Leadership is never easy. But thankful, something else is also true. Everyone of us has the potential to be a leader every day. Many people still have a narrow understanding of what leadership really is. But the fact of the matter is that leadership doesn't begin and end at the very top. It is every bit as important, perhaps more important, in the place most of us live and work. The leadership techniques that will work best for you are the ones you nurture inside. The best selling book on Human relations. 'I asked Jai what she has learned since my diagnosis,' Randy Pausch wrote about his wife in THE LAST LECTURE. 'Turns out, she could write a book titled Forget the Last Lecture; Here's the Real Story.' DREAM ON traces Jai's experiences since Randy's diagnosis, from the constant struggle she faced as a mother of three small children, to the burdens and dilemmas that accompany the role of caregiver: navigating the steep medical learning curve; managing finances; often neglecting one's one's needs; making gut-wrenching decisions; and dealing with emotions ranging from guilt and resentment, to our greatest human qualities of compassion and love. With concrete advice woven artfully into a personal narrative, DREAM ON will resonate and appeal not only to the legions of readers who made THE LAST LECTURE a phenomenal bestseller, but also to all those who have lost -- or are in the process of losing -- a loved one. Benveniste's lectures had a shaping influence on a generation of scholars that includes Barthes, Deleuze, Foucault, Derrida, Kristeva and Todorov and here, for the first time, these are made available in English for a new generation of linguists and philosophers of language. This book includes the full course of fifteen lectures which Benveniste gave in the Collège de France on the rue des Écoles in Paris between December 1968 and December 1969. Benveniste's work as offered here presents the first serious attempt at reconciling the sign theories of Saussure and Peirce and draws together, language, writing and society into a comprehensive theory of signifying. Benveniste's philosophy of language considers key concepts such as utterance, enunciation, speaker, discourse, subjectivity and as such is central to the areas of discourse analysis, text linguistics, pragmatics, semantics, conversational analysis, stylistics and semiotics. Please note: This is a companion version & not the original book. Sample Book Insights: #1 I had been diagnosed with pancreatic cancer, but I was optimistic. I knew I could cancel the lecture, but I wanted to do it. I was energized by the idea of delivering a last lecture that was really a last lecture. #2 I had come to see the lecture as the last moment of my career, a way to say goodbye to my work family. I had always liked the final scene in *The Natural*, when the aging, bleeding ballplayer Roy Hobbs miraculously hits that towering home run. #3 I knew I didn't want the lecture to focus on my cancer, as I'd already been over it and over it. I wanted to focus on living, and figure out what made me unique. #4 I had a sudden flash of insight in the waiting room of the hospital. I realized that my uniqueness came from the specific dreams that defined my 46 years of life. I had lived out these dreams because of things I had learned from extraordinary people.

The instant New York Times bestseller, now in paperback: a moving tribute to female friendships, with the inspiring story of eleven girls and the ten women they became, from the coauthor of the million-copy bestseller *The Last Lecture*

As children, they formed a special bond, growing up in the small town of Ames, Iowa. As young women, they moved to eighth different states, yet they managed to maintain an extraordinary friendship that would carry them through college and careers, marriage and motherhood, dating and divorce, the death of a child, and the mysterious death of the eleventh member of their group. Capturing their remarkable story, *The Girls from Ames* is a testament to the enduring, deep bonds of women as they experience life's challenges, and the power of friendship to overcome even the most daunting odds. The girls, now in their forties, have a lifetime of memories in common, some evocative of their generation and some that will resonate with any woman who has ever had a friend. *The Girls from Ames* demonstrates how close female relationships can shape every aspect of women's lives—their sense of themselves, their choice of men, their need for validation, their relationships with their mothers, their dreams for their daughters—and reveals how such friendships thrive, rewarding those who have committed to them. With both universal events and deeply personal moments, it's a book that every woman will relate to and be inspired by.

Behind the scenes of Minnesota history, by way of the engaging life story of the state's best-known and beloved political observer Professor Hy Berman (1925–2015) was, by most accounts, the face of public history in Minnesota for many decades—a peerless political observer and labor historian, popular lecturer and university professor, and familiar presence on the Twin Cities PBS show *Almanac*, dependably interpreting Minnesota history—and making some of his own. In *Professor Berman: The Last Lecture of Minnesota's Greatest Public Historian*, readers encounter the Hy Berman audiences and students loved, telling stories as only he could—stories that are at once a close-up view of Minnesota history and a conversational self-portrait of a man who often found himself in the middle of that history even as it was unfolding. Berman came by his passion for history and politics naturally: as the "red diaper baby" of left-wing, Yiddish-speaking Polish immigrants in New York. With humor, sharp wit, and the insight of wisdom acquired over ninety years, he takes us back to that heady 1920s milieu that set him on a path that would one day lead to, among other adventures, a brush with the House Un-American Activities Committee, a role in a black student takeover on the University of Minnesota campus, and a lifelong alliance with Minnesota's "Happy Warrior" for civil rights, Hubert Humphrey. Featuring an all-star cast of the state's politicians (from Humphrey to Rudy Perpich, Harold Stassen, Arne Carlson, and Jesse Ventura) and full of engaging, often surprising anecdotes, Berman's "last lecture" describes a rich life devoted to teaching that reached far beyond the classroom—and that found the professor translating history for an avid TV audience, helping to appoint the state's first female Supreme Court justice, and testifying at Minnesota's landmark tobacco trial. Edited and with an Introduction and Afterword by long-time Twin Cities journalist Jay Weiner, Hy Berman's final lecture is a strong and powerful contribution to Minnesota's story.

A collection of transcripts from Mark Fisher's final series of lectures at Goldsmiths, University of London, in late 2016. Edited with an introduction by Matt Colquhoun, this collection of lecture notes and transcriptions reveals acclaimed writer and blogger Mark Fisher in his element -- the classroom -- outlining a project that Fisher's death left so bittersweetly unfinished. Beginning with that most fundamental of questions -- "Do we really want what we say we want?" -- Fisher explores the relationship between desire and capitalism, and wonders what new forms of desire we might still excavate from the past, present, and future. From the emergence and failure of the counterculture in the 1970s to the continued development of his left-accelerationist line of thinking, this volume charts a tragically interrupted course for thinking about the raising of a new kind of consciousness, and the cultural and political implications of doing so. For Fisher, this process of consciousness raising was always, fundamentally, psychedelic -- just not in the way that we might think...

ABOUT THE BOOK I'd stumbled upon Randy Pausch, a youngish professor from Carnegie Mellon University, quite by accident in 2011. I'd been looking for a good PowerPoint presentation about time management, and the one he gave was deemed to be really interesting, according to the Google searches I'd done. As I read the mini-bio attached to the file, it occurred to me that I'd heard the name before, so I did some further searching and realized he had written "The Last Lecture", which I'd heard so much about a few years ago. I immediately headed out and picked up a copy. As I read, I was stunned by the powerful simplicity of his writing. I had already watched "The Last Lecture" on YouTube, as millions had during the time in which the presentation had gone viral, but I was surprised at the profound effect the book had on me. This was a man who, by all accounts, had everything going for him: a great job that he loved, three very young children and a beautiful wife whom he adored. MEET THE AUTHOR Christina St-Jean an Ontario English teacher with a great passion for American literature in particular and the written word in general. Her two daughters, aged 3 and 7, also seem to have a love of books, as her 7 year old just started reading Tom Sawyer herself. Christina follows global events as closely as she can but also enjoys entertainment news. Currently, she is working towards a black belt in karate. EXCERPT FROM THE BOOK If anything, The Last Lecture showed to the world just how pervasive media attention is today; after the lecture itself became a YouTube sensation, Pausch made appearances on The Oprah Winfrey Show and Prime Time Live with Diane Sawyer, in addition to appearing on Time's Top 100 list of the world's most influential people for 2008. He drew the attention of Katie Couric, The Wall Street Journal's Jeffrey Zaslow, director J.J. Abrams, and none other than Captain Kirk himself, William Shatner. He testified before Congress to encourage more funding to be directed to pancreatic cancer research and received a letter from the original President Bush. Buy a copy to keep reading! If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come. Benveniste's lectures had a shaping influence on a generation of scholars that includes Barthes, Deleuze, Foucault, Derrida, Kristeva and Todorov and here, for the first time, these are made available in English for a new generation of linguists and philosophers of language. Reflections of a Carnegie Mellon computer science professor who lectured on "Really achieving your childhood dreams," shortly after having been diagnosed with terminal cancer. His advice concerned seizing the moment while living, rather than dying. The author, a computer science professor diagnosed with terminal cancer, explores his life, the lessons that he has learned, how he has worked to achieve his childhood dreams, and the effect of his diagnosis on him and his family. Buy now to get the main key ideas from Randy Pausch's The Last Lecture What would you say if you could give one last talk before dying? What would you want to share with the world? In The Last Lecture (2008), Randy Pausch goes over his life and the key moments that left a mark on him. His last lecture, given at Carnegie Mellon University, was attended by around 400 people and has touched millions of others online. In the book version, which was co-written with Jeffrey Zaslow, he reflects on his childhood, his wife, his kids, his career as a professor, and his cancer. He reveals how being terminally ill impacted his perception and his approach to people and life, and offers some lessons he learned along the way. I grew up in Southern California born and raised in a wonderful family. This book tells about my life from a teenage point of view. Since this is supposed to be a rip off of The Last Lecture (Randy Pausch), I decided to make my intended audience for my future lover/spouse. Hope you enjoy!
