Since 1894, when motor racing's colourful history began with a bang (and a banger!), drivers, racers and lunatics alike have done many stupid and bizarre things all in the name of motor sport. Author Geoff Tibballs has gathered together this absorbing collection of stories from over a century of motor racing around the world, including the Frenchman who drove 25 miles in reverse, the Grand Prix in which the leading drivers were so far ahead that they stopped for a meal in the pits, the Le Mans 24-hour race won

by a car patched up with chewing gum, and the driver who drank six bottles of champagne – virtually one per pit-stop – on the way to winning the Indianapolis 500. The stories in this book are bizarre, fascinating, hilarious, and, most importantly, true. Revised, redesigned and updated for a new generation of petrolheads, this book contains enough extraordinary-but-true tales to drive anyone around the bend. Word count: 45,000 A chronological collection of 365 facts about the day, month or season, each accompanied by a short question or activity for the reader to complete. SERIES Amazon Top 10 in Paranormal & Supernatural! "FATE magazine is fascinating." - Steven King The world is not what we think it is. The individuals whose experiences you are about to read know that only too well, since nothing in their lives had prepared them for their encounters with things that are not supposed to happen - but did! Events like these remain hidden because those they happen to are afraid to speak out of a natural reluctance to have their sincerity or sanity questioned. Societies define their own realities and those who challenge them do so at their own peril. The moral seems to be that where these kinds of events are concerned, ignorance is the best policy. Ignorance, of course, will not stop people from having strange, inexplicable experiences. Mysterious stuff will continue to fall out of the sky. People will continue to have bizarre UFO encounters. Little men, monsters, talking mongooses and invisible presences won't stop their determined trespassing into our reality. While most of the world turns a deaf ear to these dimensions of experience, FATE has been listening. And a great number of people have shared their stories with FATE. You are about to read the strangest of them, the reports that represent the greatest challenge to science, reason and understanding. What you will find here, in *The World's Strangest True Stories*, is nothing less than a full, unobstructed view of these other realities, tantalizing glimpses of things that don't belong here, of worlds not our own... Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.
